It is expected that every ton of hay for sale in Canada will be exported to Europe during the next few months to supply the demands of the war, consequently there will be a heavy demand for hay wire, and a sharp advance in price is anticipated.

We have a few tons on hand and are still selling at the same old price.

We would advise intending buyers to secure what they require at once.

ALL THE HORRORS OF WAR

WHEN MEN BECOME AND ACT LIKE SAVAGES.

An Army Officer Tells of His Experiences in South

Africa.

War is brutal. It is a butcher business. Every battle means a shamble, every death a shiver of pain and a tear-sodden sorrow. The imaginative can picture the scene, the more simple have no idea of what battle means. War means death, disaster, privation, cruelty and grief. It is a bloodthirsty trade, but it is a necessary trade so long as nations remain as selfish as they are. The fool cries for war; the veteran never prays to unsheath his sword. He knows the terrible cost.

I am not theorising, for I have seen the horrors of it all. I have heard the plunk of the shell, the whistle of the bullet, and the after yell of death as a man tumbled to earth. I have seen the flower of an army slaughtered. I have wandered over a field of maimed and blood-covered heroes. This was in the African War, when I was but a simple and impressionable lad of fifteen. Till then I imagined war to be glory, chivalry and honor; now I realize that it is more ghastly than chivalrous.

In the final assault the veneer of civilization departs, and men are revealed as mad, as savage and as cruel as the pagan Goths, who

swallowed up Rome. shall never forget the brokenhearted General Gatacre retiring with his defeated army from the battle of Stormberg.

Discipline Had Gone.

Men made their own laws; some cursed their trade as they shuffled along, while in tre rear of the column staggered the wounded men. Their wails rent the sultry air, while an occasional groan cut deep into the more sensitive soul. Eventually an engine and a number of railway trucks were secured. The wagon bottoms were covered with straw, on which the wounded were laid. Buckets of water, some rough bandages and a few hard biscuits were placed inside. And then the army started for the base at East London. Every jolt jarred the bleeding and shattered bodies, while an occasional sigh signified that another man had gone.

How ghastly: how awful it seemed. Young officers, bearded ser stampeded many more, and here estate. Wills of petty officers and littered like sardines. Ammunition was issued, rifles inspected, and off went the column into action. Even the bravest has a thrill is the duty of all able-bodied men of fear. It is not of the enemy, but of the unexpected result. Will be victory? Will it mean death?

And then a bullet zipped by. Next a broken volley echoed. We were in touch.

"Extend," was the order all along the line. Out went the long lines of men.

"Lie down," was the next command. This completed, the batteries behind bellowed forth a fierce volume of artillery fire. The air was filled with shrieking shells, which circled and crashed against the rocks and entrenchments ahead. The shells were answered by the deadly creosot guns. But the Germans will wage their war in a more cruel way. Of chivalry they know nothing. This is the reason why many French officers carry phials of poison in their haversacks. They expect no mercy when wounded, and prefer to end to German hands. And should the Germans land on our shores the scenes will be awful. Heaven preserve us from such a fate. Sciatica Vanishes Instantly If Nerviline Is Used

CAN YOU BEAT THIS CASE? No brdinary liniment will even re-lieve Sciatica. Nothing but the most powerful kind of a remedy can penetrate through the tissues and finally reach the Sciatic Nerve. You can alline." Nothing made to-day is as good for Sciatica as Nerviline was when first produced, about forty years ago. All this time the same old "Nerviline" has been curing Sciatica, Lumbago, Rheumatism, and is considered to be without an equal in relieving pain or soreness anywhere. "'Nerviline' couldn't be made stronger or better," writes James E. Edwards. "The way it cures Sciatica is to me simply a miracle. For years I suffered frightfully. I ruined my stomach with internal dosing. I rubbed in gallons of oils and liniments-none were strong enough. One good rubbing with Nerviline relieved. I kept on rubbing and shortly was cured. My father cured rheumatism in his right arm and mother cured herself of chronic lumbago with Nerviline. Our family simply swears by Nerviline and we are never without a 50c, family size bottle in our home. We find that for external pain, for coughs, colds, earache, such minor ills it is a veritable family physician."

Commissariat.

The special correspondent of the lost ma enthusiasm." Paris Temps in Belgium, M. Thiebault Sisson, is greatly impressed by the equipment of the British troops, which he finds highly prac- 65,000 Chocolate Bars Going to tical. He remarks that there is no distinction, except by marks invisible at a few yards' distance, between the uniform of the officers and men.

He marvels at the method and calm shown in provisioning the troops at the front. The commissariat is really the point that appears to have made the greatest impression upon him after the equipment. An interminable line of covered carts and lorries follow the army on the march, and the quantity and variety of food carried appears to him astonishing. There is compressed hay for the animals, cases of tea, cases of cocoa, cases of sugar, boxes of tinned meat and vegetables, and immense jam pots a foot high. When the camping ground is reached everything is readly, and in a few minutes the men are able to attack a hot meal.

The correspondent also praises his own commissariat arrangements. The familiar Paris omnibuses with the designation boards Madeleine-Bastille, Clicky-Odeaon, Trocadero-Gare de l'Est, or the delivery vans of the great Paris shops, rumble to the front with immense stocks of meat and provisions. On one point, he says, he wishes the French officers would imitate the English, and that is in their treatment of spies. It is false humanity, he says, not to shoot the spy when he is caught redhanded, since he may begin again on the morrow, and his activity may cost hundreds of lives.

THREE BACES IN BELGIUM.

Racial Differences Are Obliterated When Nation is Threatened.

Belgium, which proved so grave a stumbling block to the advance of the Germans, is a land of three peoples - the French-speaking natives, chiefly of Celtic blood; the Flemings, or Flamands, a Teutonic people speaking a language that, in its literary form, is nearly one with the written Dutch, and the Walloons, another Celtic people, descended of the Gallio Belgae, whom Caesar declared the bravest of all the Gauls. A line drawn from Liege south of Brussels to Calais comes near to marking the boundary between French-speaking and Flemish-speaking Belgium, though the upper classes all speak French, whether they speak Flem ish or not, and there are Flemishspeaking workingmen in nearly all parts of Belgium, some of whom, even in Brussels, hardly speak French at all. The Walloons, mere handful, live in the Ardennes highlands, far from the coast, have their own language, and maintain a somewhat suspicious attitude towards both the French-speaking Belgians and the Flemings.

RETAIL MERCHANTS AND "MADE-IN-CANADA" POLICY

Patriotism and Self-interest Prompts Sale of Home Made Articles-Reduce Unemployment and Charity

Practical action by the Quebec branch of the Retail Merchants' Association of Canada was taken at a meeting held in Montreal immediately after the outbreak of the war. The following letter from the Quebec Secretary of the Association, Mr. J. A. Beaudry, offers good advice to the and his customer alike. Every Canadian housewife should bear in mind this timely statement when she goes into the corner store to make her next purchase:

For years past, millions of dollars worth of goods have been imported into Canada from the countries involved in the war. These importations have now practically stopped, and may not be resumed for a very considerable period. The consequence is that the MILK IN THE COCOANUT price of all imported goods has very materially increased, and will continue to increase in proportion to the excess of the demand upon the supply, and we shall not be surprised to see the supply completely exhausted with in a very short time. This fact is creating some concern in the minds of the public, who seem to believe that the merchant is responsible for such an increase.

We think it would be advisable for you to point out to your customers that in their purchases they should thereby giving employment to Canadians who, at this particular time are so much in need of earning as much as possible.

To encourage home industries is a good policy at all times, but should be acted upon at this trying period for self-preservation, and we strongly suggest that you co-operate with your customers in this matter, thereby doing your share in educating the public to this end, and by so doing, greatly oblige.

Yours truly, The Retail Merchants' Association of Canada, Inc.

s the great difference in favor of the vheat. On August 10th the Winnipeg price was 14 cents per bushel ligher than the Minneapolis price for the same kind of wheat. In fact the difference was so great that Canadian millers were forced to buy American wheat which could be laid down cheaper at Canadian mills after the freight and duty had been paid than the Canadian article. Under war conditions which, however, everyone hopes will not prevail long, it would seem that the Canadian wheat grower would suffer by a removal of the duty. The big American wheat crop has tended to reduce the price of wheat in this continent, and apparently there was possibility of the Canadian millers buying large quantities of wheat in the United States, some of which might have been used in the one million bag order, comprising Canadian flour, given to Great Britain. The Government has, however, protected the interest of the Canadian wheat growers by requiring the mills to use nothing but Canadian wheat in manufacturing this huge order.

"I'll convict 'em," said Mrs. Van Courtlandt to herself. "And I'll get a divorce from Algernon, and send that baggage Ford tramping about her business before she's an hour older!"

But, unfortunately for the dignity of her mission, the steamer gave a sudden deeward pitch as she reached the deck and Mrs. Van Courtlandt was sent staggering into the very arms of poor Leslie Ford, who, in her deep black robes, sat on a camp-stool close to the guards, gazing out wistfully over the waves. 'Mrs. Van Courtlandt!" she exclaimed,

'Yes, it's me!" said the ex-breweress, who was not always particular as to the correct use of personal pronouns. "I-I did it on purpose. I was in a hurry. Where's Algernon?" and she steadied herself by the guard-post, pretending to be quite at her ease, although the gray shade of approaching seasickness was already beginning to creep around her lips. "Nonnie? I thought he was down in the cabin with you!" Leglie answered.

"I have not seen him to-day," said Leslie, quietly. Mrs. Van Courtlandt was baffled. If she had interrupted a tete-a-tete between her husband and the maid, she would without a doubt, have been furious. As

This prophecy was written in 1892 by Archibald Forbes, the man who made war correspondence one of the fine arts.

The situation is even worse than Mr. Forbes pictured. It is not merely censorship in the usual manner, but no news is allowed to be given out except "official" news. Naturally this is devoid of interest; it lacks a great deal that the people desire to know.

It was Forbes, in the Turko-Russian War, who first brought the news to the Czar that Radetski could hold out in the Shipka Pass, having out-distanced the official messengers. In these days the Russian officials were accommodating to war correspondents and were pleased to frequently ask them for news from their own front, and also sought them out to give intelligence.

Galt Editor Urges Country-wide Organization to Promote Sale of "Made-in-Canada" Products

The Galt "Reporter," a few days ago, had the following timely and interesting editorial under the heading "Buy Canadian-made Goods" on the economic situation in Canada arising out of the war:

"While one of the immediate effects of the European war was the disorganization of trade in Canada, a Night. secondary result should be of a stimulating character. Owing to the fact that the continent of Europe is the centre of hostilities, a considerable amount of manufactured goods for merly imported from Germany, France, Austria, Belgium and other countries

Reports show that every year millions of dollars worth of manufactured goods from these countries are sold in Canada. Our own mechanics and artisans can produce such articles as well as the foreign workers and if the We have ordered a car of the manufacturers take advantage of the

turers. If the people will demand Canadian made goods they will be not only supplying their personal needs but creating work for their fellow-citizens. When the Empire is involved in such a tremendous crisis as the present there is something for at \$1.60 per M. and up all to do. We cannot all go to the front but those who stay at home can do a great deal towards creating conditions that will make the suffering here as light as possible.

"The patriotic citizen, when he goes to the store to fill his wants will demand in every case possible goods "Made in Canada." There should be a well-defined campaign carried on throughout the country urging Canadians to purchase goods of home manufacture. ORILLIA AND "MADE-IN-CANADA"

Orillia Paper Advocates Keeping Money Circulating Near Home

The Orillia "Packet," one of the

"The Orillia Furniture Company is promoting the buy-at-home idea by making use of a pay envelope which calls attention to the fact that "last year Canadians bought \$618,000,000 worth of foreign goods, half of which could have been made in Canada"-or in other words \$1,000,-000 a day which went out of the country might have been spent at home to keep Canadian factories busy. Why should not the same principle be extended a step further to "Made-in-Orillia" articles? Our merchants and people generally grumble more or less loudly if the factories are not running full blast. But do the grumblers do what is in their power to keep our home factories busy? Take the matter of furniture for instance. We have in Orillia a factory whose goods are commanding a ready sale in all parts of the country-to such an extent that it has worked more steadily Public Notice is hereby given to all during the last eighteen months than proprietors of real estate and resident any other furniture factory in Onfor, or given a preference to Orillia for their money by purchasing the farmer from any of the surrounding townships who buys Tudhope carriages, or Tudhope-Anderson wagons, implements or stoves is helping to build up the home market for his own produce, and to add to the value of his own farm. The buy-at-home principle should not be confined to dry goods and croceries."
