### DOGS IN WAR.

#### Were Used For Pursuing and Killing Fugitives.

"Dogs of war" is a phrase which once meant a thing as real as the warhorse. Dogs have played their part in battles and campaigns, and in the old wars between England and Scotland dogs were used by both combatants for pursuing and

killing fugutives after a defeat. It is related that Wallace and Bruce each had close escapes from capture by English bloodhounds. Bruce is said to have thrown the English dog off the scent by the now known expedient of wading up a stream far enough to baffle his pursuers, and Wallace evaded the hounds by having recourse to a trick more or less common in those strenuous times of killing a follower and leaving the body in the dogs' path for them to come upon. The dogs finding a body, believed that How Soldiers Amuse Themselves on their task was done, and discon-

tinued the hunt: In the history of the wars of the middle ages one finds reference to the use of big dogs against cavalry for the purpose of throwing the horses into confusion, and not alone for causing panic but casualties, for these fierce canine partisans were clothed in coats of mail studded with spikes and having scythes fitted to their harness.

Instances are recorded where war dogs with firebrands fastened to their coats of mail have been set on an enemy's camp with destructive results. Henry VIII. must have found dogs useful in military ways because in an English history it is written that he offered the use of 40,000 auxiliaries and 4,000 war dogs to King Charles V. of Spain to aid that monarch in his war with Francis I.

In the reign of Queen Elizabeth, when the Earl of Essex entered Ireland for the purpose of suppressing insurrection there. his army was accompanied by 100 bloodhounds.

Just what, precisely, is the problem of rural reconstruction? Is it merely to ameliorate the conditions of whatever rural population may be left us by the city's growth? Or is it to make a rich contribution to the cause of advancing civilization by the country's own comprehensive growth?

Dr. Josiah Strong, who was one of the pioneers in the study of the rural problem, now in effect contends that there is no rural problem but only a city one, namely, "Shall the city dominate for good or for ill? ### Defence of the Toad.

Our reference last week to the loafers who were hanging around this town as being of as little use to The British Government may be de- the Empire in this crisis as a hop claims that it is slanderous libel on less loafer who don't work and won't fight for his country. The toad is fighting the foes of vegetation all its life, and as an asset to the nation in keeping the grubs and insects down is enough to make idle loafers look cheaper than Mexican money with holes in it .- Bruce Times.

### WINNING A DECORATION.

and King Peter the Reward. An excellent story is going the

rounds about King Peter of Servia, A French tradesman who had amassmaneuvering he managed to secure a Servian cross of something or other. Companion of the Order of St. Mich- He was immensely proud of this cross,

Soon afterward he visited Servia, Hamar Greenwood, a Canadian, and and, as in duty bound, he called on cross, and King Peter, who knows something about jewels, immediately fixed his eyes on it. He himself was wearing the grand cross of the order set with rather poor brilliants, and Feb. the moment his visitor came within reach he exclaimed: "But what is this? I gave orders that you should have the grand cross. The cross alone is not worthy of you. Here, you shall

wear mine." Before the other could protest Peter had changed the cross for the grand cross, substituting the inferior jewels for the splendid diamonds on the breast of the other! As a matter of Dec. fact, of course, he had never heard of als visitor before, the decoration hav- June 21 ing been arranged by his miffisters.- Sept. London Tatler.

Fire Insurance a Tax.

Fire insurance is no doubt an institution of great benefit, especially after a fire loss. Nevertheless, it is a striking commentary upon the business judgment of the Canadian citizen that fire insurance is now also characterized as a tax, distributed, through the buying and selling process, upon the entire community; that every additional fire and every extra fire hazard tends to increase this tax, while every precaution for fire prevention and for the reduction in the number of fire losses tends to to a profit on it as well. ### A BRAVE FRENCH GIRL.

Stirring Incident of the Early Stages of the War.

The interesting story of a young girl's devotion to duty has come to us from the east of France. Berthe Levy, aged twenty-two, is an employee in the post office of the French town of Briey, which is situated just over the border from Ger-

man Lorraine. The people of Briey, like those of other French towns, were over St. Just's face she could feel the con- along placidly in their usual way all July, and if Mademoiselle Levy noticed the news of the murder of the Austrian grand duke and the declaration of war on Servia by Aus-"My darling!" said St. Just, looking tria on the posters of the news stands, it probably impressed her no more than it impressed many a young girl in America. It was only when the German troops poured nounced man and wife. Is there any time, forth from Metz that Briev awoke

ISSUES ITS STRONGEST STATE-MENT.

Cash on hand reaches record level of 17.93% and liquid assets total 46.16 % of liabilities to public. Bank writes off half a million on value Divs. of investments. Surprising results under exceptional trade conditions.

The great care which has been exercised this year by the larger banks of Canada in maintaining themselves in the strongest possible position, and in this way being able to guard against any developments that might arise in the country, is strikingly illustrated by the showing made by the Royal Bank of Canada in its annual statement for the fiscal year ending Nov. 30th, 1914.

A close study of the general statement of assets and liabilities would seem to indicate that the management has given its every consideration towards keeping the bank strong both in cash and immediate liquid assets, such a policy being rendered advisable by the very unusual conditions brought about in Canada by the outbreak of the European war. In order to maintain such a position, even opportunities for profits were apparently ignored to some extent, but as a result the statement, as a whole, is perhaps the strongest ever issued by the Royal Bank and at the present time this should be as satisfactory to shareholders as it is reassuring to the public generally. Under the conditions it enables the bank to play a prominent part in helping the Dominion through an unprecedented situation.

### The "Honeymoon."

A custom commonly observed by newly-married couples among the ancient Teutons was drinking a wine made from honey during the first thirty days after marriage. The use of the word "moon" was used simply to designate the period of time, one month, that the use of the wine continued. In no other respect was the moon supposed to have significance in the matter. Although the custom of drinking this particular kind of wine was long ago abandoned, the word honeymoon has survived in a different sense. It is now applied to the period after marriage, long or short, generally devoted to a trip away from home.
