

# THE EQUITY.

No. 50, 32ND YEAR.

SHAWVILLE, PONTIAC COUNTY, QUE., THURSDAY, JUNE 3, 1915.

\$1.00 A YEAR IN ADVANCE.

## THE BANK OF OTTAWA

ESTABLISHED 1874

Head Office: - Ottawa, Canada.

Capital Paid Up - \$ 4,000,000  
Reserve and Undivided Profits - 4,978,299  
Total Assets over - 60,000,000

### Board of Directors:

HON. GEORGE BRYSON, President.  
JOHN B. FRASER, Vice-President.  
SIR HENRY N. BATE, DAVID MACLAREN,  
RUSSELL BLACKBURN, DENIS MURPHY,  
SIR HENRY K. EGAN, HON. SIR GEORGE H. PERLEY,  
E. C. WHITNEY.  
GEORGE BURN, General Manager.  
D. M. FINNIE, Asst-General Manager.  
W. DUTHIE, Chief Inspector.

Fort Coulonge Branch - B. F. CHILTON, Manager.  
Campbells Bay Branch - R. LEGER, Manager.  
Portage du Fort Branch - A. H. MULHERN, Manager.

## The Merchants Bank Of Canada.

ESTABLISHED 1864.

Paid up Capital \$7,000,000 Reserve Fund \$7,248,134

Total Assets over Eighty-three Millions of Dollars.

President - SIR H. MONTAGUE ALLAN.  
Vice-Pres. - K. W. BLACKWELL, Gen. Manager - E. F. HEDDEN.

220 Branches and Agencies in Canada

A Savings Bank Account  
May be operated as a Joint Acct.  
Incurs no expense nor formality  
Is a most decided business asset  
Insures money for investment.

Shawville Branch } W. F. DRUM, Acting Mgr.  
Quyon Branch }

## THE HARDWARE STORE

The Hot Days will Come

- Then Ice Cream Freezers -

We have them in stock, the "Frost King" steel frame, built like a bridge, cannot break, Cedar Tubs, Galvanized Hoops, Tall cans, insure quick freezing. Construction plain and simple, easy to operate, 2, 3, 4 and 6 quarts.

And the Grass will Grow

You cannot keep your lawn clean and tidy without a good Lawn Mower. We have the good kind, made in Brockville, no trouble to get repairs when required.

J. H. SHAW.

Come and have a pleasurable evening at the picture show, Shawville Rink.

Buy it from Dover for less. Is it clothes? Sure! Dover has the largest range at lowest prices.

Have you seen the new Autograph Kodak? It's a peach. Premo Cameras for film pack, Brownie Cameras from \$1.25 up. Albums 25 cents up. Flash sheets, Flash sheet holders, Tripods, Trays, Printing frames, etc. H. IMSON.

The Elmside Homemakers' Club will meet at the home of the Misses Cuthbertson on Wednesday, June 9th, at two o'clock p.m. Subjects: Cake baking—Mrs. Harry Roy; Reading—Mrs. W. C. Young; Roll Call; Favorite Cake.

The Home-makers' Club of Bristol will meet at the home of Mrs. John A. Armstrong on Thursday, June 10th at 2 p.m. Program: The Principles of Cake Making by Mrs. R. Macfarlane; Soups by Miss S. J. Armstrong. Roll call. Wild flowers (a specimen if possible.)

PICNIC, JUNE 9—A picnic will be held in McCord's grove, North Clarendon, on Wednesday, June 9, at which a complete program of sports will be carried out. Meals will be provided and also accommodation and feed for horses. Proceeds in aid of new parsonage at Charteris. See posters.

Frank Cahill for Ottawa

Wm Hodgins for Quebec.

The Liberal Convention held at Campbells Bay last Tuesday, to decide the question of selecting candidates for the next elections to the House of Commons and the Quebec Legislature, concluded its deliberations as indicated above, and, it is claimed, the alarming breach which rent and tore the party into two hostile camps three years ago, has been closed and tranquility once more happily prevails. While this may appear to be the case from a survey of what may be termed a surface aspect of the situation, it is not positively certain that the workings of an undercurrent, which gave strong evidence of being in existence, has been definitely stilled. The projection of the figure of Dr. Dan Smith, of Ottawa, upon the party canvas at the 11th hour—no doubt to the amazement of many Pontiacers—shows that, whilst other gentlemen hitherto regarded as possible candidates had been laid aside because unavailable, a conspicuous wing of the party does not altogether relish the selection of Mr. Cahill as the party standard-bearer for the Federal House, and it is not unlikely had the popular young doctor been in the limelight a few months or even weeks ago, he would have given Mr. C. a lively run for his money.

The carrying of the convention by Mr. William Hodgins for the local House, is another incident of the meeting that will come as a surprise to many, as, so far as can be learned, his name was not mentioned in that connection until very recently, while Mr. Millar, his opponent, as president of the Liberal Association and a politician of some prominence, was regarded rather generally as the legitimate heir to the coveted honor, since the retirement of Dr. Gaboury from the political war front.

Whether the Cahill-Hodgins combination, acting as political magnet, will succeed in drawing all "the faithful" to it, remains to be seen.

The vote of the delegates on the candidature for the House of Commons stood as follows: Cahill, 72; Smith 32. For the local House it was: Hodgins, 50; Millar 45.

The convention was largely attended as is evidenced by the number of votes cast.

Addresses were delivered by Hon. Sydney Fisher, E. B. Devlin M. P., and others.

Yes! Dover is the guy who put the gain in Bar-gains.

We give first-class shows only—nothing objectionable to ladies or children. IMPERIAL THEATRE CO.

A child's purse containing a small sum of money awaits the owner at this office.

We are pleased to report that Miss Pearl McDowell is home from the hospital, looking well.

The regular monthly meeting of the Shawville Homemakers' Club, will be held in the Academy, Saturday, June 5th, at 3 p.m.

G. A. Howard has just placed Ford Cars with Messrs. Fred Thomas, Thos Thompson, and Sam Howes.

A two-cent post card for domestic use, covering both the regular postage and the war-tax is to be issued by the Department shortly.

Considerable damage is reported to have been done to garden stuff throughout the country by the frost last week.

Bush fires, started in this neighborhood last week, and fanned by the high wind spread over quite a large extent of territory, destroying a good deal of young timber.

Vincent Hodgins, son of Mr. John J. Hodgins, who has been unwell for several weeks, went to the hospital on Thursday, where he was operated on for appendicitis.

Come in and hear the new June records on the Victrola at the Russel House. RALLY E. HORNER, Agent.

Geo. W. Pingle, piano tuner, and player piano expert, of Ottawa, will make his annual trip to Shawville this week—June 1st.

Mr. J. L. Hodgins purchased a fine span of drivers in the city last week and brought home an auto which he got previously. J. L. is certainly in a position to go some now.

Viewing—I will give special reduced rates to Schools, Farm buildings, etc., on 8x10 size. Send card for quotations. H. IMSON, Artist.

A number of subscription accounts, sent out some time ago have not yet been responded to. If we have to incur the expense of sending them out again, we must do so in a way that will ensure payment.

Quite a large crowd attended the moving picture show on Saturday night and were well pleased with the program. The pictures are good. The prices have been reduced this week to 5 and 10 cents.

The mixed train service on the Pontiac line, which for the past two or three months has been running on alternate days only was resumed daily on Monday of this week. Pontiacers will hail the improvement with gratification.

The Social held on the lawn at the residence of Mr. H. T. McDowell on Friday evening last, under the auspices of L. O. L. No. 34, was well attended and a good time was enjoyed, although the weather was a shade too cool for an outdoor event. A large number of boxes were provided by the ladies, and these were disposed of at profitable figures. The sum of \$53.50 was realized.

The Homemakers' Club of Yarm, gave an entertainment and supper, the proceeds of which amounted to about \$17.00. This sum was expended for goods for the Red Cross Society. An afternoon was given to sewing, assisted by the Ladies' Aid. The convener, Miss Ferne Belsher, reported 7 prs towels, 7 prs pajamas, 8 prs socks, 7 bed jackets, 6 day shirts, 7 doz handkerchiefs and 4 prs sheets. They also sent bales of clothing to the Belgian sufferers.—Com.

## "Business as Usual"

has made the attendance at the

BOWLING Business College  
OTTAWA, ONT.

the best in the history. Why not take advantage of the dull times and prepare for the wave of prosperity that is bound to sweep over the Great Country when the war is over?

Dover sells the \$1.25 line of Peerless overalls for \$1.15.

Have a look at the motion picture advertisement in this issue. IMPERIAL THEATRE CO.

Make it a rule to buy from Dover.

### Births

At Starks Corners, on May 20th, to Mr. and Mrs. Fred J. Smart, a son.

Dover's 16-dollar blue serge suit is a corker. Have you seen them? If not, why not now?

### PERSONAL MENTION

Mr. J. H. Shaw and Miss Evelyn visited the Capital on Friday.

Mrs. R. Hobbs, Mrs. J. A. Smith, Ottawa, and niece, Mrs. Vaillant, visited in town last week.

Mr. M. C. Foster, who removed from Starks Corners to the West a few years ago, arrived here Saturday.

Mr. and Mrs. Drum and Mr. and Mrs. Howard motored to Renfrew Sunday.

Mr. Wesley Armstrong, accompanied by his wife and child, arrived here last week on a visit to his parents, Mr. and Mrs. Robt. Armstrong, after an absence of fourteen years.

Mrs. R. T. Clarke, who has been residing with her relatives in Shawville for the past five months, left for Haileybury, Ont., on Saturday, with the intention of spending Sunday with Pembroke friends.

Eventually you will be buying your clothes from Dover. Why not now?

Mr. Ed. Telford has taken over the livery business from Telford Bros., to whom he sold out last summer.

Mr. Lawrence Grant, second youngest son of Mr. John Grant, of Morehead section, has enlisted for service in the Third Contingent.

Mr. Wm J. Hayes was attacked with appendicitis on Wednesday last and taken to the hospital by automobile same evening. He was operated on at once and is reported to be doing well.

The concrete basement wall of the Shawville public building was commenced on Thursday last with a good staff on men. Dean Bros. mixing machine has been engaged for the work.

The Princess Patricia's—the first Canadian regiment to reach the war-zone, has done a lot of severe fighting, which has told very heavily on its members. Scarcely 10 per cent of the original twelve hundred odd men who left our shores, are now in the fighting line. Quite a number have been killed, a very large percentage have been wounded, some are missing and others are prisoners of war. But the gaps have been filled from other sources.

## HENRY'S SHORTHAND SCHOOL

Ottawa, Ont.

"I will study and prepare myself, and some day my chance will come."—Lincoln. That the times will be exceedingly good after the war is the general opinion. Why not, then, take up Shorthand and Typewriting, and be ready for the positions that will surely await every competent stenographer and typist? Send for circular.

D. E. HENRY, PRESIDENT.  
Cor. Bank and Sparks Sts.

## WILLIS COLLEGE

It pays to get the best.

As a Willis Student you will have the most thorough and practical training possible.

As a Willis Graduate you can always point with pride to your training school.

As an earner you will find yourself trained to the minute—thoroughness counts.

Send for catalogue.

WILLIS COLLEGE,  
N. I. HARRISON, Principal.  
Cor. Bank and Albert Sts.,  
OTTAWA, ONT.

Don't forget our liberal offer of 14 photo's for the dozen, from now until June 3rd. All sizes included.

H. IMSON, Artist,  
King Street.

FOR SALE—A quantity of Early Rose Potatoes—good for seed. Apply to Wm. G. McDOWELL, Shawville, Que.

GIRL WANTED—To do general housework. Apply to Mrs. G. A. HOWARD, Shawville.

HORSES FOR SALE—We have 30 horses for sale cheap. On account of no work in the city, we will sacrifice every horse. HEALEY CARTAGE CO., Ottawa.

FOR SALE—Pure bred Chester White Pigs, five weeks old. Apply to DAVID McDOWELL, Shawville, Que.

FOR SALE—Single buggy—practically new. Rubber tires, electric lights; a first-class stylish rig; cost \$130.—will take \$110. Also set single harness. Apply to J. H. SHAW.

CONCRETE CULVERTS, PIPES AND CURBINGS for wells sold at Works Contracts made with Municipalities to manufacture Pipes in their own localities. H. T. McDOWELL & SON, Shawville, Que.

Don't forget Dover makes suits to order.

A large shipment of wool is being made at different points along the line of railway, under the direction of the Pontiac Wool Growers' Association, this week.

### June Rod and Gun.

"The Glittering Lure" is the title given by Bonnycastle Dale to a story of before-the-season fishing in the opening pages of June Rod and Gun which is published at Woodstock, Ont. by W. J. Taylor, Limited. "Honest Weight" is an amusing tale of two rival fishermen as related by one of the French Canadian guides who accompanied them on their outing after "de beeg wan." "Three Swedes there were" is also a humorous story relating the experiences of a "vulgar, rambling trio" showing how everything turns to ashes to those without a purpose. "Sport in and around the Rocky Mountains" "Carefree Days in Newfoundland," etc., and the regular departments which later are full of interest to the fisherman and gunner, make up a very interesting early summer issue.

## About the Household

### Tested Recipes.

**Ginger Creams.**—1 cup molasses (Orleans), half cup brown sugar, two-thirds cup butter (or equal parts butter and lard), half cup cold water, a heaping teaspoon soda and half teaspoon good ginger, also cinnamon; flour to the consistency of ordinary cookies. Try these and you surely will pronounce them excellent.

**Corn Bread with Baking Powder.**—1 tablespoon butter and 2 tablespoons sugar beaten together; add 1 egg (well beaten), two-thirds cup of corn meal, half cup wheat flour, two tablespoons baking powder, pinch salt, half cup sweet milk. Deserving of a trial.

**White Sponge Cake.**—Five eggs (whites only) beaten very stiff, two cups sugar; beat eggs and sugar twenty minutes; one cup boiling milk (fresh), two cups flour sifted five times, two teaspoons baking powder, flavor to taste. Bake from 30 to 40 minutes in moderate oven. I have such fine luck with this recipe that I seldom make an angel food any more; it's such a fine substitute.

**French Omelet.**—Break three eggs in basin, take a tablespoon of cream and one level teaspoon butter (melted). Whip together until they froth well. Put two teaspoons butter in frying pan, let it get real hot; pour mixture in, turn when browned nicely. Lift and serve on parsley. Parsley and cold ham minced well, and added to the egg before cooking makes a very agreeable omelet.

**Loaf Cake.**—1½ cups white sugar, half cup butter, half cup grated chocolate, teaspoon each cinnamon, cloves, allspice and nutmeg. Mix all these together. Then add two eggs (beaten lightly), one-third cup baking syrup, one cup good clear coffee, 2½ cups flour, half teaspoon soda, one teaspoon baking powder, one pound currants (cleaned), cut (to suit taste). Flour the nut meats and currants. This sounds like a strange mixture, but I have made it for the past 23 years and I still think it fine, especially for a picnic cake or social, for 'tis such a generous size and stays moist so nicely.

**English Cream Pie.**—One cup sour cream, one cup raisins (soaked and chopped), one egg, two dessert spoons vinegar, one dessert spoon flour, half teaspoon sugar. Reserve white of egg for frosting. Cook mixture, and bake crust separately. If one likes nutmeg, a dash could be added to mixture.

**Jello in Orange Cups.**—Have you ever tried making orange jello and putting it in orange baskets? Cut off a portion of orange at stem end, scoop orange pulp out, and fill the basket about half full of jello; then heap whipped cream upon the jello until it stands up prettily, then stick a candied cherry on top. Use the pulp, of course, to make the jello.

**Spice Cake.**—Half cup butter, half cup brown sugar, half cup molasses, one teaspoon soda, one cup sour milk, two cups flour, one tablespoon each lemon, vanilla, cinnamon and ginger; half teaspoon each cloves and allspice; one cup each raisins, currants and nuts.

**Cream Cookies.**—One and two-thirds cups sugar; two-thirds cup lard (and butter); one cup sour cream (11-4); two eggs; three teaspoons baking powder; one level teaspoon soda; a little salt, lemon, and lastly flour.

**Pickled Beans.**—Scald in salted water about 20 minutes, beans which have been split from end to end sideways. Put in strong brine to keep.

**Tomato Relish.**—Chop one peck pared ripe tomatoes; drain; add

to pulp about six chopped onions, three or four red peppers which have had seeds removed; then add one ounce cinnamon, 2 ounces white mustard, two pounds brown sugar, half cup salt, one teaspoon pepper, a little celery seed and mix well. Can without cooking.

### Useful Hints.

All cooking utensils should be washed with soda immediately after they have been used, which will remove every trace of grease.

Keep white paper on each shelf of the refrigerator. It gives a clean appearance, and keeps things from dropping on the shelf below.

When making an omelet it is best to thin down the eggs with a few tablespoons of hot water instead of milk. This makes a more tender omelet.

Before using dish-cloths to greasy articles remove from the latter as much grease as possible with crushed paper. This will greatly help to preserve the good condition of kitchen cloths.

It is a fair, even-handed, noble adjustment of things that while there is infection in disease and sorrow there is nothing in the world so irresistibly contagious as laughter and good humor.

Before using milk for custard heat it thoroughly, then cool it, and use it in the ordinary way. The custard will not become watery. Don't forget to add a pinch of salt, as it improves the flavor. If the custard is to be put in a pie mix one teaspoonful of flour with the dry sugar before adding the milk and eggs. This takes the place of one egg, and the custard is just as rich.

It is not hard to stop the hair from falling out and promote its growth if the right means are used. There is no hope for the scalp where the hair roots are dead and the scalp is shiny. However, to those who have not reached this condition immediate steps should be taken to stop it before it is too late. Here is a simple recipe which you can make at home that will stop the hair from falling out, promote its growth, and eradicate scalp eruptions and scalp humors. To a half-pint of water add one ounce of bay rum, a small box of Orlex Compound, and a quarter of an ounce of glycerine and apply to the hair, rubbing with the fingertips two or three times a week. These ingredients can be obtained at any chemist's at very little cost and mixed at home. This recipe not only promotes the growth of hair, but darkens streaked, faded grey hair, and makes it soft and glossy.

### Why Taffy "Pulls" White.

Taffy made from sugar or molasses becomes white by pulling. Do you know why?

The exposure to the air and the friction evaporate the syrup, which contains most of the coloring matter, and facilitates oxidation of the carbon in the sugar, which is always white, contains eleven atoms of oxygen to twelve atoms of carbon and eleven atoms of hydrogen.

The syrup drained from the same sugar in the refining process not only contains more or less coloring matter, but has a smaller proportion of oxygen to the amount of carbon.

Still another reason why sugar is whitened in pulling is that this operation, like the crushing process when applied to rock candy, one of the purest forms of sugar, destroys or impairs its power of absorbing light, and causes it to reflect all the elementary colors in each ray, which, of course, results in white light.

## The Duty of Spending

One of the causes of the present industrial depression is the short-sighted economy of those whose spending power has not been seriously curtailed. The fact is easily established by the bank returns showing increases in deposits. Since thousands of manufacturers', wholesalers' and retailers' employees have been thrown out of work, or have had their wages reduced, it is evident that their bank accounts must have either disappeared or decreased. Consequently the total savings bank deposits could only increase by substantial additions to the accounts of those whose incomes have escaped the general cut. Such persons are putting their surpluses into the banks instead of spending them. This means that they are going without clothes, furniture, machinery, and many other articles in order to increase their savings.

The effect becomes apparent in our imports entered for consumption as follows: year ending March 31st, 1913, \$670,000,000; year ending March 31st, 1914, 618,000,000;

year ending March 31st, 1915, \$455,000,000.

These decreases in our purchases abroad indicate that there must be correspondingly great decreases in our purchases at home. It is true that our borrowings from England have been seriously curtailed, but it is also true that they have been replaced to a certain extent by sales of bonds in the United States which, since the outbreak of war, have amounted to about \$70,000,000. The people of Canada, after three years of great extravagance, have gone suddenly to the other extreme and have been frightened into a fit of rigid economy. The result has been a serious decrease in manufactured output. If every man in Canada determined to do without neckties for a year, for example, the effect would be severe to the manufacturers who make neckties. If those who have money would spend it within reasonable limits, our factories would be benefited to an almost incredible extent, employment would be furnished to many who need it and the return to prosperity would be hastened.

Women Aid in Policing London While Regular "Bobbies" are at the Front.

While many of the regular London policemen are serving in the trenches at the front, their places have been taken by women, just as women have succeeded to the other work of man in most of the countries now at war. The picture shows three female "Bobbies" on parade, receiving instructions from an inspector. So far, the feminine custodians of the peace have proved very efficient and have done their duty quite as well as the men had done it in the past.

### Remove Male Birds.

Eggs which have been fertilized constitute the greatest proportion of the inferior stock which, when examined, proves unfit for food. It is not necessary that these shall have remained for a time under a broody hen, a temperature of seventy degrees being, in itself, sufficient to cause the germ to commence to grow. If the heat is constant the development of the chick will continue, but if it ceases or is intermittent, putrefaction at once sets in and the egg becomes bad. On the other hand infertile eggs which are free from the active germ cell, do not, under ordinary conditions, deteriorate seriously.

Few farmers seem to realize these facts, and consequently very few make any effort to insure fertility. The impression prevails among many, that the presence of the male bird in the flock is essential to the production of a maximum number of eggs. This assumption has been proven, time and time again, to be absolutely without foundation.

Farmers and others selling eggs for market are recommended to kill off or dispose of the male birds after the breeding season. As a result of their remaining with the flock after June 1st, Canadian farmers lose each year at least a million dollars, through the presence of partially incubated eggs in the produce which is marketed. The fact that the best trade in many cities in Canada now offers the premium of from one to five cents per dozen, for non-fertilized eggs, suggests an additional financial consideration which but few can afford to overlook.

### Disposing of Eggs.

1. Study carefully the rules for the production and marketing of new-laid eggs.
2. Remember that only the strict observance of these simple rules will bring the highest prices and improve the quality of eggs generally.
3. Be careful to stamp the eggs on the large end only.
4. In stamping do not bear too heavily upon the ink pad when inking the stamp nor on the egg when stamping.
5. Never wet the ink pad, if it becomes dry speak to the collector and he will re-ink the pad for you.
6. If the stamp becomes detached from the wooden handle, it can be readily repaired with a good muck.
7. Do not allow the children to stamp the eggs until you have taught them to do so properly, by allowing them to practise on the eggs to be used at home.
8. On wet mornings it is a good plan to throw down a little clean straw on the floor of the poultry house. The number of dirty eggs can be materially lessened if the hens scratch in the straw before going to the nests to lay.
9. Do not stamp the very small or the very dirty eggs. They may be packed separately and marketed as a second grade through the egg circle.
10. Be a good co-operator by always being prepared and ready for the collector when he calls.
11. Do everything in your power to support your egg circle. Remember that you are a vital unit in it and that it is necessary for each member to be loyal to the association to enable it to succeed.
12. Remember that the reputation of your circle depends upon quality.
13. Strive to make your circle the best in the Dominion.

## THESE CURES ARE STARTLING

### SCORES OF SPECIFICS WHICH ARE NOT RECOGNIZED.

#### In Russia Miraculous Cures are Credited to an Exclusive Diet of Milk of Mares.

If men continue to suffer from the "ills that flesh is heir to," it is certainly from no lack of "cures," each of which is guaranteed to remove one or other of them, says London Answers.

For consumption alone there are scores of specifics not recognized by our College of Physicians. Thus, in Switzerland, the patient must eat five or six pounds of grapes daily; in France, snails and raw meat are warranted to make a sound man of him; in Germany, salted herring-roes are said to work wonders; and in Russia, miraculous cures are credited to an exclusive diet of the fermented milk of mares.

#### Grapes & Mutton.

From America we learn of a newly discovered cure "the results of which will startle the world"—the injection, by means of a hypodermic needle, of nitrogen gas into the pleural cavity; which is scarcely as attractive as the daily consumption of five or six pounds of grapes prescribed in Switzerland; while in England it is claimed that hundreds of consumptives have been restored to health by a diet of roast beef and mutton, as much of each as the patient can swallow—"beef in wedges an inch thick, and mutton in huge slabs."

If you are burdened with "too, too solid flesh," a score of infallible methods of dissipating it are at your disposal, from a daily menu containing such items as toast saturated with butter; beef-marrow soup, and fat meat smothered with equally fat sauce, to the "Salisbury System," which prescribes a daily dietary of three pounds of steak, one pound of cod, and six pints of hot water.

If insomnia be the bane of your life, do not despair. Dr. Pardini, of Turin, can make you sleep as soundly and dreamlessly as a baby by the simple expedient of making you "imitate the drowsy noddings of a tired man while sitting in a chair," at the same time simulating the deep breathing of a sleeper. A few minutes of these exercises and you are wrapped in the arms of Morpheus.

#### Some Strenuous Remedies.

In New York hundreds of women have been cured of a variety of ailments, from anaemia to neurasthenia, by spending an hour daily in going up and down in a lift; just as hundreds of others have found the worst colds in the head dissipated when tapped on the forehead over the nose and eyes with a rubber hammer. Even acute forms of insanity have yielded to the magic of goat's lymph injected hypodermically into hips and arms four times a day; and, it is said, the most obstinate case of hay-fever is not proof against a sound and repeated boxing of the patient's ears.

If you suffer from rheumatism you will, so they say, find wonderful efficacy in a plentiful dose of bee-stings, which are a very favorite remedy in Malta.

Of curative baths, from mud to brine, the "name is legion"; but not one of them, it is claimed, works such wonders as the electric light bath. The patient reclines on a couch, placed inside a mirrored cabinet illuminated by sixty-two powerful incandescent lights, under whose rays the most obdurate of bacteria cannot long survive to do mischief.

A well-known professor declares that there are few diseases which cannot be cured or alleviated by the music of an organ judiciously applied. "The person taking the treatment," he says, "is extended at full length on a cot supported by wooden rods and placed between the organ pipes; and selections are played to suit the one taking the treatment." The cure is effected by the vibration of the cot under the influence of the organ pipes.

#### Try Smiling.

For nervous diseases and melancholia, one well-known doctor prescribes the smile cure. "Smile, keep on smiling, don't stop smiling," his directions are; "keep the corners of your mouth turned up. If this simple treatment is persisted in daily," he says, "the effect on the patient's nerves and spirits is little short of marvellous."

Even those who suffer the tortures of love-sickness may hope for a restoration to sanity; for it can be cured, like any other disorder, by medical treatment. The remedies for this distressing malady are: separation from the object of the lover's devotion, change of occupation, tonics to restore the nervous system, and—cold douches!

#### Making the Most of Words.

Economizing words becomes second nature to those continually engaged in telephoning and making long lists. The London Christian Life tells of a warrant officer of the ordnance department who was of a devout temperament and assisted at church service. On one occasion, announcing the hymn, he read out in a loud voice of command: "Hymn number two double O seven—Art thou weary; ditto languid; ditto sore distressed?"

On an average, each person in the United Kingdom receives by post every year 75 letters, 20 postcards, 25 halfpenny packets, and 4 newspapers.

## The Food Value of Milk

Prof. M. J. Rosenau, professor of preventative medicine and hygiene, Harvard Medical School, is recognized as America's foremost pure milk authority and author of "The Milk Question," etc. Writing in "Safe Milk," published by City Dairy Co., Toronto, Professor Rosenau says:

"Milk is one of the cheapest foods on the market. It is also one of the best. It is best because it is so easily digested, and because it is one of the most nourishing of all our standard articles of diet."

"Milk contains all of the ingredients needed to nourish the body. It contains these ingredients in just the right proportion which experience and science show should be contained in a well-balanced ration. Thus, it contains:

Albumin, like white of egg ... 1.5%  
Sugar, like cane sugar ... 7%  
Fat, like butter ... 3 to 4%  
Salt, like com. table salt 0.2%  
Water ... 87%

"The albumin furnishes the materials which build up the body and keep it in repair. The fat and sugar provide fuel to keep the body warm and furnish it with power needed to do its work. The water and salt are necessary for life. Milk also contains antitoxins, useful cells and other substances that are of great importance, especially to the infant. It must be plain, then, that milk is an enormously complex substance—it is both food and drink. The infant thrives on milk alone, and the adult can live for months with nothing else."

"Milk may be served in a number of different ways, as custards, puddings, sauces, cream, ice cream,

## INFERIOR LIGHTNING RODS.

Prof. W. H. Day, B.A., professor of physics in Ontario Agricultural College, Guelph, writes to warn the farmers of Ontario against inferior lightning rods. One of the same companies that buncoed the farmers with iron-centred rods last year is reported to be selling the same rod again this year. Watch out for them.

There is no difficulty in spotting these rods. The outside covering is a thin sheet of copper. Inside of the copper is a strip of galvanized steel or iron one-half inch wide and two galvanized steel or iron wires about No. 10. The copper sheath is twisted around the strip and wires, giving the rod a corrugated appearance. The steel or iron will rust out in from five to ten years. For photograph of what happened to a rod of this kind in less than eight years see Figure 34, Bulletin 220, which may be had by writing the Department of Agriculture, Toronto.

An Illinois firm is circularizing the trade and others advocating the "Mast" lightning rod system. They declare that twisted cables are positively dangerous, claiming they act like "choke-coils," that tubes only should be used, that insulators must be used, etc. For concentrated essence of error these circulars surpass anything else I have seen.

Beware of the man with the iron-centred rod and the man who claims that twisted cables are dangerous. This Department will be glad to be informed regarding the operations of either.

### The Intimate Friend.

Possibly there are few families to whom the pleasure of an intimate friend is unknown. She may be a middle-aged woman who, lacking the joy of a family of her own, takes a loving motherly interest in the boys and girls of an old school friend between herself and whom there is a strong affinity and affection. She may be a young girl, merry enough to be an entertaining friend to those of her own age and sufficiently sympathetic, homely, and conversational to make a kind and charming deputy daughter when the occasion demands.

Or she may be a married woman, living near enough to these chief friends of hers to make it possible to spend a fair amount of time with them without neglecting her home or children.

But whoever she may be, the intimate friend, if she be of the right kind, is invariably a source of happiness in the family. If a day is dull or lacking in event there is always the knowledge or hope that she will run in if only for a quarter of an hour to bring news and interest from her home or the outside world, to sympathize and give advice, to help decide some much-debated point, or to suggest a game for the younger children who have exhausted mother's ideas.

### The Truth At Last.

A San Francisco clergyman recently at the close of his sermon announced that in the course of the week he expected to go on a mission to the heathen. One of the parishioners exclaimed, "Why, my dear doctor, you have never told us one word of this before. It leaves us unprepared, what shall we do?" "Brother," said the minister, solemnly, "I shall not leave town."

Short sight is very rare in savages.

cheese, etc. It has been figured out by Government experts that 16% of the ordinary American diet consists of milk or milk products. This figure is an evidence of the very important place milk has on the family dining table as well as on the family purse.

"When compared with other articles, the food value of milk normally contains a large proportion of water—87%. When, however, the portions ordinarily served at meals are considered, the high worth of milk is clearly shown. Thus, the food value of a glass of milk is approximately equal to two large eggs, a large serving of lean meat, two moderate sized potatoes, five tablespoonfuls of good cereal, three tablespoonfuls of boiled rice, or two slices of bread.

"One quart of milk is about equal in food value to one of the following: two lbs. of salt codfish, three lbs. of fresh codfish, two lbs. of chicken, four lbs. of beef, five lbs. of turnips, one-sixth lb. of butter, one-third lb. of wheat flour, one-third lb. of cheese, three-quarters lb. of lean round beef, eight eggs, two lbs. of potatoes, six lbs. of spinach, seven lbs. of lettuce, four lbs. of cabbage.

"Milk varies somewhat in composition, especially in amount of butter fat (cream) it contains. Certain cows furnish richer milk than others, therefore, it is customary in good dairy practice to mix the milk of several cows immediately after it is drawn. In this way the consumer is assured a more uniform product from day to day.

"In the household, milk should always be kept cold, clean, and covered."

# The Automobile

## FARM LIFE HAPPIER.

The farmer does not now have to stay at home if he has a car. He does not feel himself rooted to the spot. His wife and children will be happier and more contented. An automobile brings freedom—freedom from isolation, freedom from loneliness, freedom from the limitations of time and distance.

To the farmer a car is far more than a mere luxury. It is a vital necessity to him and his family. It offers a welcome relief. It makes him a better worker by giving him recreation and pleasure he could not otherwise have. Its broadening mental effect is one of its greatest benefits to him.

Once the farmer has an automobile he soon finds himself looking forward to summer evening rides with his family, with the cool breeze blowing away the fever heat of the day's work in the fields. He finds himself able to go on pleasure trips, to picnics, and so on, with his wife and children, which hitherto he was unable to enjoy because of the distance to be covered in the time at his disposal. Many a man has reported that he doesn't feel the

## Hard Work of the Farm

as much as he did before his car gave him the needed relaxation.

A man can't get the same rest and relaxation out of a horse. In the second place, the chances are he is sorry for the brute. If a man has any sympathy and feeling for animals he knows that they must have rest over night and on Sundays. A horse is too slow and the distance he can cover is too small for any one really to get any great amount of recreation from an evening's drive. At the same time, an automobile costs money only when in actual use, unlike the horse, which is a constant expense.

In winter instead of hugging the fire, trying to keep warm, and dreading the next trip, he will have to make to town, the farmer can go and come with comfort and just as often as he pleases.

The automobile also facilitates communication and intercourse.

and because it does it is one of the foremost influences in fostering a strong sense of good fellowship and fraternal co-operation among farmers.

When the church, the school and the grange flourish, the opportunities for recreation and

## Social Betterment

are naturally multiplied. In enabling the farmer to make the most of these institutions the automobile helps to support and develop them and also renders its owner one more invaluable service.

This influence of the automobile is only natural. When a man shuts himself off from his neighbors and sees very little of them he soon loses interest in them or what they are doing. He gets so that he cares very little about anything but what is taking place in his own little sphere. He builds about himself, as it were, a Chinese wall of indifference.

Another argument for the car on the farm lies in the fact that while in the city the working unit is generally only the head of the family, on the farm all hands turn in and help. There is work for young and old. And while the farmer himself does his full share, he has certain advantages, as compared with his faithful helpmate, who is not only tied down to the house, but also probably has the cares of a family of little ones.

Progressive farmers to-day appreciate that the women folk deserve a better, brighter life. And nothing has made the life of farm women brighter and broader than the automobile. An hour's ride—a visit with laughter, song and gaiety, do more to erase the marks of care and preserve the roses of youth than any other means.

And of course if an automobile in the family proves beneficial to a man and his wife, it cannot help making a big difference in the upbringing of the children. A car provides just the safety valve needed to let out the excess energies and spirits of the growing boys and girls on the farm. It gives the former city advantages, without city drawbacks.

The Emergency Marine Gangway—It Might Have Helped in Case of Lusitania.

This ingenious and practical means for enabling passengers to embark to lifeboats, or for the reverse operation after rescues have been performed during stormy weather at sea, is the recently patented invention of Captain Arthur N. McGray, a widely-known ship-master. It has been carefully examined by many experienced authorities and officers who have participated in recent noteworthy rescues and bears their highest endorsement as answering the recommendation of the London Conference on Safety at Sea that "suitable arrangements shall be made for embarking the passengers in the boats."

This structure is portable and quickly thrown into operative position. It consists of two long booms, which are swung out at right angles to the side of the ship, about fifteen feet apart, and have suitable floats attached to their outer ends. Between the booms is stretched a strong wire net over which passengers can readily pass. The equipment is held securely in place by guy-lines. Thus, lifeboats are lowered to the water with only a working crew in them. When safely afloat the boat is brought head-on to the outer end of the emergency gangway and there temporarily moored, while, under the direction of an executive officer, the proper number of passengers only are permitted to enter the gangway and thereby "safely and sanely" reach the waiting boat.

In the case of the Lusitania, several boats full of passengers were capsized as they struck the water, and many lives were lost which might have been saved had some such device as that shown above been in operation.

"Here we are. This is where the wheels are made."

## In the Hands of the Potter.

It was a vast workshop, and all over it were molds for wheels. We watched men pour the boiling liquid into the molds. And we watched the metal gradually hardened. And we watched the workmen lift up the molds and disclose the completed wheel. Some of the wheels seemed to me to be more like the wheels of locomotives than of gun-carriages. It seemed I was right.

The output of this one workshop alone must have been tremendous, for it was between two and three hundred feet wide and over an eighth of a mile long. A big gallery ran all round it, and there was a perfect maze of girders about the roof, while several suspended cranes swung up huge boilers in the making and ran about with them from one end of the building to the other. Nor did the workmen stop to stare at us. They ignored our very existence and went on with their work as usual.

"I think we'll go now and have a look at the pottery."

"Pottery?" I echoed.

"Yes. The molten metal for making cast steel is carried in clay pots and they turn out five thousand of these pots in the pottery every day."

So to the pottery we went, and when we had seen the men busily engaged in making crucibles, as the earthenware pots are called, we departed for the place where the celebrated crucible steel is made.

What an animated scene met my eyes. Men walked about rapidly in pairs carrying between them crucibles full of white-hot liquid steel on long metal bars. There was no faltering or hesitation on their part. They journeyed straight to the particular mold at which they were engaged, with the assistance of many other men, in filling and poured in their quota of metal.

Back and forth walked the men with their burdens of scalding metal in their clay pots. Every moment I expected to see some of those pots split asunder and spill that deadly liquid on the carriers. But the pots did not split because they were made of a particular kind of earth which can withstand a greater heat than vessels made of armor-plate itself could withstand.

## Steel Without a Flaw.

I watched the men filling a huge mold which, when it was completed, would be a 60-ton block of steel. Drop by drop the molten steel, was being poured into it. And that is the secret Krupp discovered. By pouring in comparatively small quantities of molten metal at a time air bubbles were given a chance to escape, and a flawless block of steel was the result. A simple idea, but it was worth millions of pounds.

My head was beginning to ache, so I was rather glad when my friend suggested luncheon. We rode back to the Eschenhof Hotel and partook of a meal, after which, as a change from the inside sightseeing, I was taken over the ranges where the big guns are tested. Like everything else at Essen the ranges are gigantic, one of them being 16 miles long. This is used solely for test-

ing the biggest of guns. Unfortunately, there were no big guns being tested at the time, and I had to be satisfied with examining armor-plates that had been used for previous tests.

"Before we start I want to see some one in here," said my friend next day, and I followed him into one of the offices. While I was waiting, the official to whom my friend was talking looked up some letters in a case, and calling a messenger told him to take the letters along to some one in the next department. I commented on this a little later, and learned a lot about Krupp methods.

No man in Krupp's is allowed to know too much. Correspondence going from one room to another is looked up, so that the messenger cannot read it. A man may have been employed there all his life without knowing anything outside his particular department and without being allowed to go over other parts of the works. Even high-placed German army officers are not allowed to see all the works. In fact, every precaution is taken to prevent a man gaining more information than is necessary. Krupp agents are everywhere in the building, but I thought they were merely workmen who were not very busy.

## Children's Sleep.

Much information as to the health of a child may be gained by careful watching of its attitude, movements, and expression during sleep. The child who sleeps best with the mouth wide open, and the head thrown back, is most likely suffering from enlarged tonsils, which impede its breathing; if it can only sleep when the bedclothes have all been kicked off rickets should be watched for, while lung or heart affections are shown at an early stage by the tendency to sleep high up on the pillow, so that the head and shoulders are raised. In cases of pain in any part the hand will be found to be carried to the affected spot during sleep, so that teething, headache, or earache may be diagnosed, while a curious sign of irritation in the stomach or bowels is the constant rubbing of the nose. Restless sleep, broken and uneasy, is a common symptom of the onset of serious illness, but any extreme torpor and drowsiness should also be suspected, as these frequently precede feverish ailments, such as scarlatina and measles. Convulsive attacks are nearly always preceded by the tight claspings of the hands, with the thumbs folded into the palms, and the stiffening and curling up of the toes.

## New Bullet Cures.

Mr. Alex. F. Humphrey of Pittsburgh, Pa., has invented a bullet for war use that is the absolute opposite to some respects of the "poisoned bullets" mentioned in the early dispatches of the war, for it carries in its nickel jacket anaesthetics to deaden the pain of its wound, and antiseptics to help to heal it. Enough narcotics are contained in the bullet to greatly lessen the pain or shock in the nervous system of a wound even in the most vital organs.

Has been Canada's favorite yeast for more than forty years.

Enough for 5c. to produce 50 large loaves of fine, wholesome nourishing home made bread. Do not experiment, there is nothing just as good.

**EWGILLET CO. LTD.**  
TORONTO, ONT.  
WINNIPEG MONTREAL

## IN GREAT DEMAND.

Immense Quantities of Ice Cream Consumed.

Ice cream dealers are making plans for a busy summer, the period of their greatest prosperity. A large city on a good hot day, consumes about 50,000 gallons, or 200,000 quarts of ice cream. One big firm alone has been known to sell 20,000 gallons in the space of twenty-four hours, which shows just what a great city can do when it goes out on an ice cream celebration.

The trade is one which is affected very quickly by weather conditions and the reports from the weather bureau are scanned closely in order that the proper amount of ice cream for a certain day can be made. While the product can be manufactured and stored in coolers for future use without the slightest deterioration, still the fluctuations are so great that a uniform output each day cannot be maintained. A drop in temperature coming over night will send the ice cream business to a fraction of what it was on a previous hot day.

The first indication of a hot spell in summer finds the big freezers working at full capacity to prepare for the emergency. Cooler weather will mean a decided diminution of the product and a building up of the stores of milk and cream in country depots to be drawn on as soon as the situation improves. By making a study of the business and through the experience of long years, the larger concerns know the proper way to go about assuring themselves of steady incomes. As their production decreases their supplies increase, and vice versa, so there is no real loss.

Vanilla ice cream forms about two-thirds of the output, with chocolate second and strawberry third. Vanilla, while being the most popular, is used to a great extent in soda fountains, where it is put up in drinks of various other flavors. This accounts in a large way for its supremacy.

## KRUPP'S BIG STEEL WORKS

## WHAT AN OUTSIDER SAW IN THE GREAT STEEL PLANT.

## It Is Remarkable the Easy Way Metal is Worked in Making Gun Barrels.

I thought it very strange that Krupp's should take my photograph surreptitiously. It savored somewhat of prison procedure, writes a correspondent in the Philadelphia Ledger. Undoubtedly, they required my photograph for some means of identification if need arose. They desired to make sure of recognizing me again. I have no doubt now that they wanted my portrait for their secret service—for Krupp's have the most perfect secret service in Christendom, with agents all over the world—and when the Allies get to Essen I expect they will find that photograph of mine in the archives of Krupp's. At the time I thought it queer treatment to mete out to a guest.

## Dealing a Heavy Blow.

"You mustn't be surprised at anything that happens here," said my friend. "The officials here have to take care. By the way, is isn't wise to go wandering about or you might get into trouble. You won't forget to keep close beside me."

"Fritz," I found out, was the pride of Krupp's—a giant steam-hammer that has been in use since 1860. People thought Alfred Krupp mad when he started to build "Fritz." The hammer cost \$500,000, and is as good to-day as ever, so it has repaid its cost many times over in its half-century of hard hitting. Kings have cracked nuts with it. I did the same. I placed a nut beneath it, and "Fritz" cracked it perfectly without so much as touching the kernel. Yet the same hammer can deal a blow of 50 tons which no metal can withstand.

I was told that there were 160 of these great steam hammers in the place. I can quite believe it, for I saw a large number, and if the facts are correct, they must have cost several millions of dollars to build. I noticed, however, that even in Krupp's they cannot get on without Britain, for at least one steam hammer I saw was made in Sheffield.

## Miracles of Science.

The noise, of course, was maddening. Wherever you go at Krupp's you cannot get away from the clanking and hammering of metal. Even where there is no hammering going on you can hear the sounds from afar.

**TORONTO'S MOST POPULAR SUMMER DISSIPATION IS CITY DAIRY ICE CREAM**—the demand has spread from year to year until it is now on sale in nearly every town in Ontario. There seems to be something about the climate of Canada that makes it the confection that everybody craves in warm weather—infants, invalids, children or grown-ups, it makes no difference what your state or station. City Dairy Ice Cream is most refreshing, nourishing and digestible.

For Sale by discriminating shopkeepers everywhere

**City Dairy**

Look for the Sign.

**TORONTO.**

We want an agent in every town.

## THE EQUITY.

SHAWVILLE, JUNE 3, 1915.

At a Liberal gathering in Toronto the other night Sir Wilfrid proposed a truce in party warfare till the end of the war, and pledged himself to an honorable observance of it provided Sir Robert Borden agreed to postpone the general election until then. The trouble is that Sir Wilfrid cannot control his followers. Five partisans, men like Mr. Pugsley, Mr. Carvell, Mr. Kyte and Mr. McKenzie of Cape Breton, together with such unscrupulous Liberal newspapers as the Halifax Chronicle, Toronto Globe and Winnipeg Free Press, cannot be restrained by any word or act of his from assailing the Borden Administration day in and day out; and in the nature of things the Conservative press deems it its duty to hit back.

Just now Liberal editors in the Maritime Provinces are apparently urging their Ottawa correspondents to invent some fresh equipment scandals, and the correspondents are, of course, quite equal to the task. One of them writes that of the 80,000 pairs of boots supplied to the Militia Department at the commencement of the war 60,000 were worthless. As a matter of fact only 80 pairs, or one in every thousand, were condemned, whilst, as the Premier showed in the House, out of a total expenditure of \$50,000,000 for general war purposes the loss to the treasury from peculation and misrepresentation was only one-eighteenth of one per cent. The Transcontinental, which according to Sir Wilfrid was to have cost \$60,000,000 at the outside, actually cost \$170,000,000, the sum wasted through incompetent management or downright theft being estimated by the Gaudin Commission at over \$30,000,000 or 20 per cent.

### One Liberal Paper Pays Fair Tribute to the Government.

While opposing a general election the Winnipeg Tribune, whose editor was Opposition candidate in the Macdonald by-election in 1913, pays a well-deserved tribute to the work of the Borden Government and its laudable efforts to protect the treasury from the "system" so long in force under Sir Wilfrid Laurier.

"If some unwise criticism of the Government has been made here and there by unthinking partisans," says the Tribune editor in a recent issue, "that does not represent the real feeling of the people. Generally speaking the Government has done well in prosecuting the interests of the war."

In discussing the Public Accounts revelations and the wild charges of graft made by the Liberal press, the Tribune admits that whatever party was in power attempts would be made to secure undue and unfair profits. It points out that nothing of a colossal nature has been shown to exist, and pays this tribute to the Government's earnestness in its fight for honest administration:

"The offences have rather been of a petty character and the Government has shown every desire and earnestness in bringing the guilty to justice, and to prevent a repetition of wrong doing. The people of Canada ask for nothing more."

What a contrast to the wild, unfounded charges of the Toronto Globe, Montreal Herald, Halifax Herald and other organs of less importance!

### BRITAIN'S WAR CABINET

#### Coalition Government a Strong Combination

London, May 25.—Lord Kitchener retains the post of Secretary of War in the Coalition Cabinet which has received the approval of King George. The new First Lord of the Admiralty will be Arthur J. Balfour. Winston Spencer Churchill, former head of the Admiralty, is given the portfolio of Chancellor of the Duchy of Lancaster. Herbert H. Asquith retains the Premiership and Sir Edward Grey the Ministry of Foreign Affairs. David Lloyd George, Chancellor of the Exchequer in the old cabinet, will be Minister of Munitions in the new one. The constitution of the new cabinet follows:

Prime Minister and First Lord of the Treasury—Mr. Asquith.  
Minister without portfolio—Lord Lansdowne.  
Lord High Chancellor—Sir Stanley O. Buckmaster.  
Lord President of the Council—Lord Crewe.  
Lord Privy Seal—Lord Curzon of Kedleston.  
Chancellor of the Exchequer—Reginald McKenna.  
Secretary of State for Home Affairs—Sir John A. Simon.  
Secretary of State for Foreign Affairs—Sir Edward Grey.  
Secretary for the Colonies—Andrew Bonar Law.  
Secretary for India—J. Austin Chamberlain.

## CRIPPLED BY RHEUMATISM

434 N.Y. Ave., Whiting, Ind. Jan. 20th.  
"Will you please send me a box of Gin Pills? When I sent for the last box, I was so badly swollen, that I could hardly see out of my eyes, but after taking about six of the pills, I felt some better; and after a few days, I had no more pain. I have recommended Gin Pills to some of my friends, who are troubled in the same way. I never intend to be without them as I have tried so many other pills and got no results."  
Mrs. ED. DEAN.

## Gin Pills

FOR THE KIDNEYS  
You can readily tell if your kidneys or bladder is affected. You will have pains in the small of the back, groin or hips, your urine will be highly colored, brick dust or mucus deposits will show in the morning, your wrists or ankles may swell, all due to inactive kidneys which Gin Pills will soon put right.

Gin Pills are "Made in Canada". 50c a box, 6 for \$2.50—at all dealers—Sold in U.S. under the name "GINO" Pills. Trial treatment free if you write National Drug & Chemical Co. of Canada, Limited, Toronto.

## THE MARKETS.

### SHAWVILLE

Flour per barrel \$7.50  
Wheat, per bushel, standard \$1.25.  
Oats, per bushel, 53c.  
Butter, tubs, prints and rolls 24c.  
Potatoes per bag, 75c.  
Eggs per dozen 18c.  
Pork per 100 lbs. 7.50 to 8.00.  
Hides per 100 lb 10.00  
Pelts 75 to \$1.00 each  
Horse Hides each 2.50  
Calveskins each 75 to 90  
Wool washed per lb. 30c to 32c  
Hay per ton \$16.50

### OTTAWA.

The following are last Saturday's quotations:  
Butter, in print 35c to 38c  
Butter in pails 32c to 35c  
Eggs, fresh, per dozen 18c to 23c  
Potatoes per bag 65 to 70c.  
Pork, per 100 lbs. \$8.00 to 13.50  
Beef, per 100 lbs. \$8.50 to 10.00  
Oats per bushel 60c  
Hay per ton 18.00 to 22.00

Secretary of State for War—Lord Kitchener.  
Minister of Munitions—David Lloyd George.  
First Lord of the Admiralty—Arthur J. Balfour.  
President of the Board of Trade—Walter Runciman.  
President of the Local Government Board—Walter H. Long.  
Chancellor of the Duchy of Lancaster—Winston Spencer Churchill.  
Chief Secretary for Ireland—Augustine Birrell.  
Secretary for Scotland—Thomas McKinnon Wood.  
President of the Board of Agriculture—Lord Selborne.  
First Commissioner of Works—Lewis Harcourt.  
President of the Board of Education—Arthur Henderson.  
Attorney General—Sir Edward Carson.  
The official announcement on the new cabinet says:

"A place in the Cabinet was offered to Mr. John Redmond (the Irish Nationalist leader), but he did not see his way to accept it."  
"The Prime Minister has decided that a new department shall be created to be called the Ministry of Munition, charged with organizing the supply of munitions of war. Mr. Lloyd George has undertaken the formation and temporary direction of this department and during his tenure of office as Minister of Munitions will vacate the office of Chancellor of the Exchequer."

### Preparing to Use Gas.

London, May 26.—The British Government is preparing to meet the use of asphyxiating gases by the Germans by employing the same methods. It is understood that two years ago an English inventor devised a scheme for the use of such gasses in warfare. He submitted the plans to the British War Office, but received no encouragement. When the news of the use of gas by the Germans appeared, the man went to the War Office again and his plans were readily accepted. He was asked how much money he wanted for the method, but declined to accept a penny, turning over the chemical formula and the mechanical device without remuneration.  
Two large factories, it is said, are now preparing the necessary chemicals and the other necessary parts.

## Sergeant Michael O'Leary, V.C. has been Killed

Dublin, May 27.—Relatives of Sergeant Michael O'Leary, of the Irish Guards, who has been hailed as "the bravest man in the British army," because of his feat in capturing, unaided, a German position at Quinchy, were notified today that he had been killed in battle.

For his valor at Quinchy, O'Leary, who was 24 years old, was awarded the Victoria Cross, and promoted from corporal to sergeant.

He formerly served in the Northwest Mounted Police, with headquarters at Regina, Canada.

### REPORT CONTRADICTED.

London, May 28.—There is reason to hope that the unofficial report of the death of Sgt. O'Leary, V.C., is incorrect. A letter from an artilleryman, saying that O'Leary had been killed in his last battle was dated May 24.

The Macdonald Times has received a letter bearing the same date from Lance Corporal H. Bailey, Second Battalion Grenadier Guards, who says that O'Leary was among a number of men, of whom the writer was one, who attended church on Monday.

### Ontario to Supply Hospital of One Thousand Beds.

Toronto, May 28.—To establish and maintain in England a hospital of 1,000 beds for the treatment of Canadians who have been wounded or otherwise incapacitated, is the main feature of the Ontario Government's latest war contribution, according to announcement made today by Hon. Dr. Pyne. It is understood that the idea is to have ten cottages, with 100 beds to each, and that the cost of construction will reach somewhere in the region of \$100,000. To this is added the outlay on maintenance. Although the hospital provision will not be confined to troops from Ontario, the cottages, it is believed, will bear the name of the province from which the gift comes.

In addition to this offer to the War Office, the Government is arranging to provide immediately six motor ambulances, which will be sent to France. Further aid to the men at the front is under consideration.

### American Steamer Nebraskan Torpedoed?

London, May 26.—The American steamer Nebraskan, Captain Green, from Liverpool May 24 for Delaware breakwater, was torpedoed yesterday by a submarine at a point 40 miles west southwest of Fastnet, off the south coast of Ireland. The sea was calm at the time. The crew at once took to the boats and stood by the steamer.

It was soon ascertained that the Nebraskan was not seriously damaged. She had been struck forward and her foreholds were full of water. The crew returned on board and got the vessel under weigh. No lives were lost among the crew. The Nebraskan did not carry any passengers.

The foregoing information was received today by the British Admiralty in London and it was at once communicated to the American Embassy.

An examination of the hull of the vessel will be necessary to determine whether she was torpedoed or struck a drifting mine.

### H. M. S. Warship Triumph Torpedoed.

London, May 26.—The British battleship Triumph has been sunk in the Dardanelles. This official announcement was made tonight.

The disaster to the Triumph is described in a brief statement by the Admiralty, which says that while operating in support of the Australian and New Zealand forces on the shore of the Gallipoli peninsula yesterday, the Triumph was torpedoed by a submarine and sank shortly afterwards.

The majority of the officers and men, including the captain and commander, are reported to have been saved. The submarine was chased by destroyers and patrolling small craft until dark.

The Triumph, which was commanded by Captain Maurice S. Fitzmaurice, was a vessel of 11,985 tons and of 12,500 horse power. She was built for the Chilean government in 1902 and then purchased by the British government. Her crew of officers and men in times of peace numbered about 700 men. The vessel carried four 10-inch, fourteen 5-inch guns and fourteen 14-pounders and four 6-pounders. In addition she carried two 18-inch torpedo tubes.

The Triumph was 436 feet long and had a speed of about 20 knots.

The Triumph is credited with having done more fighting than any other British warship since the war began.

### MAJESTIC, ALSO.

London, May 27.—The torpedoing and sinking of the British battleship Majestic is announced by the Admiralty today. The vessel was sunk off Seddini Bahr, in the Dardanelles.

The Majestic was built in 1895. She carried four 12-inch, twelve 6-inch, sixteen 3-inch and twelve 3-pounder guns. In addition the vessel was armed with five 18-inch torpedo tubes. Her crew numbered 757 men, who were nearly all saved.

The sinking of the Majestic makes the fifth British battleship lost in the Dardanelles' campaign, the second by a hostile submarine, the Triumph having been sent to the bottom in the Gulf of Saros last Wednesday. The French also have lost one battleship in the Turkish campaign—the Bouvet.

## For Service.

Registered Holstein Bull for Service. Fee 75 cents.

GEO. G. HODGINS, R. M. D. No. 2.

## FOR SERVICE.

The undersigned offers for service the registered Holstein-Friesian Bull 'Shawville Chief,' No. 10964. Fee—one dollar. This animal took first prize at the Shawville Fair of 1914.

H. A. HORNER, 5th Line Clarendon.

## Farm for Sale.

Lot No. 11, in the 11th range of Clarendon, containing 275 acres of fairly good loam soil. All necessary buildings required on a farm. Will be sold on easy terms. For further particulars apply to M. McCULLOUGH, Campbells Bay, Que.

## TEACHER WANTED

Qualified Teacher (Protestant) for Aldfield School No. 1. Eight months' term. Duties to commence August 16, and close Dec. 23, 1915. Re-opens on March 15, 1916 and finishes the last day of June. Applicants to state salary wanted. WM. C. STENDER, Sec.-Treas., Ladysmith, Que.

## Tenders for Fencing

Tenders will be received by the undersigned up till 2 o'clock p. m. of Saturday, 19th June, 1915, for fencing one side (road side) of No. 2 School grounds. Two gates, one 12 feet and one 3 feet. Fence, seven strands wire and barb wire on top, posts 16 feet apart; also for fencing one side of No. 1 School grounds.

M. A. MCKINLEY, Asst. Secy. Treas., Clarendon Schools.

Shawville, May 31st, 1915.

## CANADIAN PACIFIC RAILWAY CO. RESUMPTION OF TRAINS

Commencing Monday, May 31st, 1915. Trains No. 5 and 6 will be resumed, which provides double daily service between Montreal, Winnipeg, Calgary and Vancouver leaving Ottawa Broad Street daily for Winnipeg, Calgary and Vancouver at 2.10 p. m. and 2.05 a. m.

For further particulars apply to any Can. Pac. Ry. Agent.

E. J. HEBERT, 1st Asst. Genl. Pass. Agent, Montreal, Que.

### A Monster Flag Pole.

A big flag staff 216 feet long has been made ready for shipment to England as a present from the Government of British Columbia. The big stick is the most perfect specimen of a tree in existence, for from end to end it is absolutely without a flaw. When it was cut on the timber limits in British Columbia, it was 236 feet long, but 20 feet was cut off, owing to a flaw being detected. Since the workmen have finished dressing it into shape, the stick now is 32 inches in diameter at the base for a distance of 16 feet. For the next 100 feet it has an octagonal shape and for the last 100 feet it is perfectly round. The upper 200 feet is a gentle taper from 32 inches to 12 inches.

### CHARTERIS

The Ladies' Guild of St. Matthew's Church, North Clarendon, was inaugurated on Thursday, May 27th, with a service in church at 2 p. m., which was followed by a business meeting in the new parsonage.

The Guild promises to be most successful. The attendance was large and representative, having a membership to commence with of 14, with several ladies associating as visitors.

The officers elected were: President—Mrs. (Rev.) Chas. Reid; Vice-President—Mrs. Charles Atkinson; Sec.-Treasurer—Mrs. John Alfred Hodgins. The Guild meets on June 24th in the home of the Sec.-Treasurer, Mrs. John A. Hodgins.

A very active and important part is being taken in the arrangements and preparations for the picnic in McCord's Grove on June 9th, in aid of the Parsonage Fund.

### Might Be All Right.

Philosophers tell us to brighten the world with smiles, which would be all right were there not so many people who are happy only when they have something to make them sob.

### A Cold and a Coolness.

"Did you ever have a cold," inquired the plain citizen, "that you couldn't get rid of?"  
"No," answered the purist. "If I had had a cold I couldn't get rid of it I would have it now."  
Thus the coolness arose.

### Good Guess.

First Passenger—I understand that your city has the rottenest political ring in the country.

Second Passenger—That's right. But how did you know where I'm from?

First Passenger—I don't.

## SHAWVILLE SASH AND DOOR FACTORY.

TRADE MARK

## NO CRACKS

Are ever seen in walls and ceilings made of Beaver Board. Durable, beautiful, sanitary. Forty-one advantages. Call and see how it looks.

For sale by R. G. HODGINS.

invented.

Prices away below those of the city  
dealers.

M. R. MCGUIRE,  
Shawville.

## HENRY SHRAPNEL.

Inventor of the Deadly War Missile and  
His Reward.

Shrapnel was originally the name of  
a British general who, about a hun-  
dred years ago, was begging the board  
of ordinance of his native land for some  
substantial recognition in respect of  
the new and deadly missile he had  
placed absolutely at their service and  
was being told that the institution in  
question "had no funds at its disposal  
or the reward of merit."

Henry Shrapnel's invention was  
probably first employed at Surinam in  
1804 and was then "favorably report-  
ed on," but eleven years later Sir  
George Wood, who commanded the ar-  
tillery at Waterloo, declared that  
shrapnel had won that famous battle.  
Without it, Wood asserted, no effort of  
the British could have recovered the  
armhouse of La Haye Sainte.

In 1814 the government granted  
Shrapnel a pension of £1,200 a year  
for life, but this was interpreted by  
his paymasters to cover all the inven-  
tions Shrapnel had given to the army,  
including an ingenious gun mounting  
whereby the recoil was utilized to  
bring one gun into action at the same  
time as another was put under cover.  
Shrapnel was thus placed at a disad-  
vantage, though he had the satisfac-  
tion of drawing his pension to a ripe  
old age. He died in 1842, aged eighty-  
one.—Argonaut.

### THE MALTESE DERBY.

Its Curious Race Course With Go as  
You Please Rules.

Horse racing is a favorite sport the  
world over, but it is doubtful whether  
any nation can boast of such a curious  
race course or claim more remarkable  
ideas of the sport than the Maltese.

Once a year the road skirting Sliema  
harbor is reserved as a race course, and  
the people turn out in thousands.  
There is no regulation of the course.  
The crowd simply clears out of the  
way as the horses come along.

The jockeys ride without bridles or  
saddles, and each carries a whip in  
either hand—one for his own mount,  
the other to keep back any horse which  
may try to overtake him. We saw one  
of the spectators deliberately trip a  
horse up by putting his leg out, at  
grave risk to himself.

These things, however incredible as  
they seem to sportsmen in this coun-  
try, are taken as quite a matter of  
course, and consequently hardly a year  
goes by without a fatality of some  
kind. All things considered, it is not  
likely that the "go as you please" rules  
of this Maltese derby are likely to com-  
mend themselves to other turf authori-  
ties.—Wide World Magazine.

#### Quicksilver.

The ore from which quicksilver is  
obtained is a brilliant red rock known  
as cinnabar. When of high purity it  
is actually vermilion in color. Cinnabar  
is the original source of the pig-  
ment known commercially as vermilion.  
It is a compound of sulphur and  
quicksilver, and in order to separate  
the latter from the sulphur the rock is  
roasted. Passing off in the form of a  
gas, the mercury is afterward con-  
densed and flows out in a fine stream,  
like a continuous pencil of molten sil-  
ver. Like gold and silver, mercury is  
occasionally found in a native or pure  
state. Sometimes the miner's pick  
penetrates a cavity that contains a  
cupful or more of the elusive and beau-  
tiful fluid. Miners suffer much from  
the poisonous effects of the quicksilver  
fumes. Extreme cleanliness is the best  
safeguard for workers in this danger-  
ous occupation.

#### Moving Picture Tricks.

Some of the most thrilling scenes in  
the moving picture dramas are taken  
with the aid of small models, which  
are considerably less than life size.  
It is much cheaper, of course, to burn  
up a toy building or to sink a minia-  
ture ship than to destroy an original  
to make a moving picture holiday. The  
models used for this work are carried  
out with great attention to detail, and  
the pictures are taken with the cam-  
era very close to the ground to get  
the proper perspective. The moving  
picture audiences, even when paying  
the closest attention, are completely  
deceived.—Boston Herald.

#### The Stronger Material.

A crockery dealer was just closing  
up his store for the day when one of  
his customers, a grocer, came in in a  
great hurry.

"Here," said he, "I packed this jar  
full of butter and the jar split from  
top to bottom. Perhaps you can ex-  
plain the phenomenon."

"Oh, yes; I can!" was the ready re-  
ply. "The butter was stronger than  
the jar."—Atlanta Constitution.

#### Side Stepped.

"I can give you a cold bite," said the  
woman.

"Why not warm it up?" asked the  
man.

"There ain't any wood sawed."  
"So? Well, give it to me cold."—New  
York Sun.

#### Accommodating Him.

Youth—Oh, I don't want to take that  
character. I'll make a fool of myself  
sure. Maiden—Well, you said you want-  
ed an easy part.—Exchange.

#### Ruinous.

Crawford—I hear it was a bad fail-  
ure. Crabshaw—Very. Even the re-  
sellers didn't make anything out of it.  
—Puck.

## Umbrellas and Parasols.

Made with 8 ribbed frame, steel handles and covered  
with silk or with a good wearing black mixture  
fabric. The handles come in a wide selection of  
neat designs, with sterling silver or gold mountings.  
Complete with tassels. Prices range from a girl's  
school parasol at 50 cents, to a lady's all silk \$2.75.

## Men's Raincoats

A good Raincoat is a necessity in this Canadian climate.  
When you have added one to your equipment you  
don't need to fear the weather. We are showing  
them both in Cotton and Wool cloths, made in  
plain sleeves with storm collars—Olive shades.  
Price \$5 to \$10 each.

## Women's Raincoats

We are showing these in the new Cashmere finish; also  
in Silk Poplins. Shades of Tan, Brown, Grey and  
Green; also in Tweed effects. Prices from \$5.00  
to \$12.50.

Straw Hats in all the latest  
shapes.

### Teacher Wanted

A Lady Teacher for Litchfield Upper  
School (Collfield) holding an Element-  
ary diploma, or permit. Applications,  
stating salary wanted, to be sent to the  
undersigned before the 12th of June,  
next.

JOHN STEVENSON,  
Sec.-Treas.

Campbells Bay, 14th May, 1914.

SEALED TENDERS addressed to  
the undersigned, and endorsed "Tenders  
for Supplying Coal for the Dominion  
Buildings," will be received at this office  
until 4.00 P. M., on Thursday, June 17,  
1915, for the supply of coal for the Pub-  
lic Buildings throughout the Dominion.  
Combined specification and form of  
tender can be obtained on application  
at this office and from the caretakers of  
the different Dominion Buildings.

Persons tendering are notified that  
tenders will not be considered unless  
made on the printed forms supplied,  
and signed with their actual signatures.

Each tender must be accompanied by  
an accepted cheque on a chartered bank,  
payable to the order of the Honorable  
the Minister of Public Works, equal to  
ten per cent (10 p. c.) of the amount of  
the tender, which will be forfeited if the  
person tendering decline to enter into a  
contract when called upon to do so or  
fail to complete the contract. If the  
tender be not accepted the cheque will  
be returned.

By order,  
R. C. DESROCHER,

Secretary.

Department of Public Works,  
Ottawa, May 29, 1915.  
Newspapers will not be paid for this  
advertisement if they insert it without  
authority from the Department.

### SYNOPSIS OF CANADIAN NORTHWEST LAND REGULATIONS.

THE sole head of a family, or any male  
over 18 years old, may homestead a  
quarter section of available Dominion  
land in Manitoba, Saskatchewan or Al-  
berta. Applicant must appear in  
person at the Dominion Lands Agency  
or Sub-agency for the District. Entry  
by proxy may be made at any Dominion  
Lands Agency (but not sub-agency) on  
certain conditions.

Duties.—Six months' residence upon  
and cultivation of the land in each of  
three years. A homesteader may live  
within nine mile of his homestead on a  
farm of at least 80 acres, on certain con-  
ditions. A habitable house is required  
except when residence is performed in  
the vicinity.

In certain districts a homesteader in  
good standing may pre-empt a quarter-  
section alongside his homestead. Price  
\$3.00 per acre.

Duties.—Six months' residence in each  
of three years after earning homestead  
patent; also 80 acres extra cultivation.  
Pre-emption patent may be obtained as  
soon as homestead patent, on certain  
conditions.

A settler who has exhausted his home-  
stead right may take a purchased home-  
stead in certain districts. Price \$3.00  
per acre. Duties.—Must reside six  
months in each of three years, cultivate  
80 acres and erect a house worth \$300.

The area of cultivation is subject to re-  
duction in case of rough, scrubby or stony  
land. Live stock may be substituted for  
cultivation under certain conditions.

W. W. CORY, C. M. G.,

Deputy of the Minister of the Interior  
N. B.—Unauthorized publication of  
this advertisement will not be paid for.

### HELP PROTECT THE DEER.

And other Game during Close Season  
by reporting at once to the undersigned  
any violation of the Game Law you be-  
come aware of. Liberal compensation  
paid for convicting evidence. All cor-  
respondence strictly private and confi-  
dential.

N. McCUAIC

Bryson, January 1915.

### Removal Notice

I desire to inform the public that  
I have removed the Meat Shop to  
the new premises, next door west  
of the G. F. Hodgins Co's store,  
where I am in a better position to  
cater to the wants of customers  
than heretofore.

Your esteemed patronage solicited  
GEO. PRENDERGAST.

STRAYED—From the Parsonage at  
Starks Corners, a little black and tan  
dog, answering to the name of Gamie.  
Any information that will lead to its  
whereabouts would be highly appre-  
ciated. Missing since Tuesday, May  
10, 1915.  
ROBT. E. NICHOLLS.

# Boots That Stood the Test

AMES HOLDEN MCCREADY LIMITED, Canada's largest shoe manufacturers, supplied, within thirty-three days, 32,217 pairs of leather ankle boots and 30,000 pairs of canvas shoes for the outfitting of the First Canadian Contingent, the largest quantity supplied by any manufacturer.

These boots were worn by our soldiers on active service both in this country and in the training camps in England. They were subjected to the most severe usage that boots could be subjected to. They travelled over rough roads and smooth. They waded through mud and through slush past all description. They were soaked by the never-ceasing rains of an abnormally wet English winter. They were baked on hot stoves, grilled on steam radiators and roasted before open fires. Yet, THEY STOOD THE TEST.

Out of the entire 32,217 pairs of leather boots supplied by this company only a single pair was shown to be open to criticism when the Government enquiry was made six months later.

Experts employed by the Government examined 1365 pairs and 348 odd boots made by various manufacturers. Among the number were found only seven pairs of boots of Ames Holden McCready manufacture, of which five were found to be repairable, one pair unrepairable, and ONE PAIR HAD A SOLE UNDER GAUGE.

The best proof of the durability and serviceability of the Ames Holden McCready boots, however, was afforded by the sworn statements of soldiers who had worn these boots constantly from the time they were issued in September, 1914, right through to March, 1915. They swore that they had worn the boots through all the rough experiences at Valcartier and on Salisbury Plain and that they had given excellent service throughout. Sergeant Nussey, of Toronto, who had served twelve years in the British Army, appeared before the Committee with a pair of such boots still on his feet and submitted them to the committee's inspection.

The testimony of these witnesses has since

been amply corroborated by numerous reports and letters received from officers and soldiers at the front all testifying to the good wearing qualities of the Ames Holden McCready boots.

When the question was raised concerning the quality of the Canadian soldiers' boots, Ames Holden McCready Limited placed themselves IMMEDIATELY upon record, by writing to the Government, as desirous of having the most thorough investigation of the matter. The appointment of a Parliamentary Committee and the official enquiry followed. It occupied several weeks' time. The Committee stopped at nothing in their efforts to get at all the facts.

This Company purchased the best leather and supplies available in Canada and spared no expense in manufacturing the boots. All our invoices, and shop and manufacturing records were produced before the Parliamentary Committee for their inspection and information. We had nothing to hide and were proud of the boots which were furnished to the Government.

THE AMES HOLDEN MCCREADY BOOTS CAME OUT OF THE ORDEAL UNSCATHED.

The Committee reported to Parliament that the boots supplied by this company substantially complied with the sample, that no paper or other fraudulent substances had been employed in their manufacture and that all charges involving the integrity of this company or of the boots supplied by them had been abundantly disproven by the sworn evidence taken before the Committee.

The report, which was adopted by Parliament, was a COMPLETE VINDICATION FOR AMES HOLDEN MCCREADY LIMITED.

In bringing these facts prominently before the people of the Dominion, Ames Holden McCready Limited are actuated by the desire not only to protect their own good name — which needs no vindication with the thousands of Canadians who are familiar with this company and its products — but also that of a notable and important Canadian industry, which has been unwarrantably aspersed.

## Woman Against Woman

or A Terrible Accusation.

CHAPTER XII.—(Continued).

"Poor boy," she was saying, tenderly. "I wonder if you can ever realize how sorry I am for you? How I appreciate the never-varying patience you have had! Oh, Leslie, who can understand all you have undergone so well as I? I, who love her, and who love you!"

She started as if she had betrayed more than she intended to, and her hand trembled. Evidently she observed it, for he answered gently:

"You have been very good, Muriel. I have not forgotten that it was for her sake and to help me that you gave up Gay Charlton."

She drew her hands away, and after a

moment of apparent resistance, covered her face with them, sinking down upon the rug at his side, moaning bitterly. After a moment of surprised silence, he took both her hands in his and drew them from her face.

"Muriel!" he exclaimed, gently, "was it such a trial, dear? Was it so hard to give him up? Child—child, I know so well what love is now that I can not accept the sacrifice from you. Recall him, Muriel. It is not too late. I will not have your life deprived of all its happiness for her. She is not worth it. You shall not lose all that is bright and beautiful."

But to his surprise she had snatched her hands from him and had arisen, her whole countenance quivering with an apparently uncontrollable emotion.

"Oh, how little you know!" she cried out passionately. "How little you have understood. Do you think any woman's life is great enough to yield the sacrifice you think I have for the sake of a sister? I do not claim such goodness. I am only human, Leslie, so pitifully human, with a heart like that of any other weak woman. Do you think I could have given up my love—my life—to her? Do you think I was great enough for that? God help me! You have never understood what it was for your sake—for your sake I did it."

"Muriel, what are you saying?" He was upon his feet now and had taken her by the shoulders. She had thrown her head back and was looking him straight in the eye.

"The truth at last!" she cried, "because I have not the courage to longer act a lie! Perhaps I am a little weaker than usual, perhaps worn out by the awful scenes we have witnessed together, but I can not bear the deception. I am going to tell you the truth, and then let you hate me, if you will, loathe me for my falsity and treachery to my sister, banish me forever from your home, if you must. It was not for her sake, but for yours. I could not bear to leave you, because I loved you!"

She had sunk slowly down as she said the last three words, slowly, lingeringly, until she reached his feet, her face covered again with her hands, her whole body quivering with sobs.

He stood there for a time, his hand lifted to his brow, as if in bewilderment, then he leaned over and raised her gently.

"Muriel," he said, softly, "I confess that you have surprised me beyond words. Of course it is all nonsense, the idea of my loathing you or banishing you from this house because of what you have said; but it can't be true. You are mistaken, dear. You are nervous and overwrought. You don't mean what you have said, and will regret it all before the day has passed. You will—"

"No—no!" she gasped. "I know that as

will have pity upon me—surely you will have pity!"

She was sobbing again. He put his arm about her and drew her tenderly to him.

"My poor Muriel!" he said, softly. "My poor Muriel!"

But there was nothing of love in the tone, nothing of love in the touch. And she seemed to realize it all too clearly, for suddenly she raised her eyes and looked full into his own.

The softness of the tigress with her cub had vanished. It was the old Muriel now, the Muriel whom Alesia knew and hated. She looked long, earnestly, then suddenly Alesia saw her lift her hand and touch his forehead just between the eyes. There was fierce determination in her expression, chastely determined, and as Alesia watched, with her heart trembling almost to suffocation, she saw Dunraven away slightly. Her eyes unfocused themselves from Muriel and wandered to him.

He was still looking at her, the expression of gentle pity frozen upon his countenance until it appeared almost stupid. "Will you—love me, Leslie," the voice of the girl was saying, "when she is no longer—here?"

He did not reply. Alesia's heart was beating so loud she feared that both would hear.

"Will you love me, Leslie?" the horrible voice repeated.

"Yes," he answered, dully.

And then, while Alesia still watched, she leaned and kissed him full upon the lips. Alesia barely repressed a cry of horror. Those lips to touch those that had pressed her own! Those repulsive lips! She could bear it no longer. Turning, she fled back to the room of the doubly betrayed wife.

The situation was all hideously clear to her now.

Leslie, indeed, murder that was being committed, and the murderer was using her terrible power for a double purpose—first to put the wife to death, and next to establish herself in the dead one's place as mistress of that household and wife of its master.

She loved Leslie Dunraven, and would not hesitate at any crime that separated herself from him.

And then, too, for the first time, Alesia seemed to understand all her own imminent danger.

CHAPTER XIII.

Alesia was sitting by the side of Ethel's bed, leaning forward with her elbows upon her knees, her chin in her hand, her eyes fixed upon that ghastly face, that unregarded, irregular beauty.

She must have been sitting there for half an hour, utterly oblivious of everything, unconscious of the passage of time, when the door opened, and Dunraven entered.

She lifted her head and looked at him. He was pale, haggard, almost unkempt in appearance. The uncanny sensation upon her forehead, the cold, clammy sweat, the faint, less compressed, less choked with horror in a vault than standing in the presence of that man whom she loved, and that living, breathing thing upon the bed.

She did not get up, because it seemed well-nigh impossible for her to move. She stared at him for a moment in stony silence. He had staggered over to the side of the bed, and stood leaning against the wall looking at her, the vague, shadowy terror in his eyes causing her to shiver.

She broke the awful silence at last by saying:

"If you don't want your wife to die, Leslie, you must send for a doctor at once."

He started as if she had struck him.

"Die!" he gasped.

"Yes," she answered. "Can't you see? Listen to her breathing. Look into her face! Do you want—murder done?"

"The horrible word seemed to arouse him from his lethargy. He did not reply to her, but turned with a swiftness of movement for which she would not have given him credit from his appearance, and left the room.

She did not know where he had gone, and she was not, in a condition, mentally, to inquire. He returned in less than fifteen minutes, with a medical man beside him.

Muriel was not there!

Some plan seemed to have formed upon the impulse of the moment in Alesia's brain, even as she looked into the doctor's strong, kindly eyes, for she found an excuse to send Dunraven from the room.

When she was alone with the physician,

whom Dunraven had introduced to her doctor, she went up to him swiftly, and in her excitement placed her hand upon his arm.

"Doctor Paxton," she exclaimed, eagerly, "do you believe in hypnotism?"

He smiled at her kindly.

"Why?" he questioned, gently.

"Because, if you do not, I had as well keep the hideous truth concerning this household to myself as to say, then perhaps you can help me to save that poor young wife who lies there, the victim not of her own appetite, as is supposed by her husband and brother, but of hypnotism. She is the victim of—her sister!"

"Muriel? Good Heavens! What are you talking of?"

Alesia wrung her hands helplessly. Had she encountered another of Muriel's followers? Was she never to discover any one who would believe in her words?

"You know her?" she gasped.

"I have known her since she was a little child," he answered, gently. "I brought her into the world."

Then you committed a greater sin than you know! cried Alesia, desperately. Listen! You must listen, and if you do not believe me, make your own investigation. Ethel Dunraven does not take morphine of her own volition! She is the helpless victim of her sister, who commands her as absolutely by the glance of her eye as you could command a horse by the touch of a bridle. Muriel thinks she has me under the influence of her loathsome hypnotic power, and in my presence she has made that poor girl rave and swear and tear her hair, and beg for the drug which two minutes before she had entreated me to save her from. She has—

"Tut! tut! child! You are mad! What motive could she possibly have? What—"

"You shall know that also!" cried Alesia, her voice repeating in her ear. "An hour ago I went in search of Mr. Dunraven to beg him to send for aid, and saw her—Muriel—in his room, heard her confess her love to her sister, who was then there that he had nothing but pity to give her, she exerted her infamous power over him, until he promised that after his wife's death she should take his place. Ah! you shiver and draw back, yet I swear to you that what I have said is true! I swear to you that I saw with my own eyes, heard with my own ears, the thing which I have related to you. There is a curse upon this household. I entreat of you to believe me, and help me save her."

The doctor smiled, and patted her beautiful head soothingly.

"There! there!" he exclaimed, gently. "You are overwrought and unstrung from your residence beneath this roof. A sensitive, nervous thing like you should never have been allowed to remain here. My dear child, Mrs. Dunraven has inherited this awful malady from her father. He was exactly like her in every particular. I have heard him claim the same absurdity that he was influenced by some unknown power. The word 'hypnotism' was not on the tongue of every one then as it is now, but it was known as 'influence'—it was called 'bewitchment'—superstitions, Mrs. Dunraven is greatly to be pitied, but you must not allow her to fill your pretty little head with such nonsense as that. Why, she will have you imagining that you are influenced by a morphine next. I must tell Dunraven to send you away before it is too late."

"I beg that you will not!" cried Alesia, earnestly. "I entreat that you will not. Do you think I would leave her alone here without a friend, to meet her death in this hideous way—murdered, and no revenge to be worked upon her murderer?"

What is there in life for me? I tell you that I will remain, that I must remain, and I will pray to God to send me a means to save her. Ah! surely God will know and help me!"

She turned away, for the first time weeping bitterly.

For a moment Doctor Paxton looked after her curiously, then turned his attention to Ethel Dunraven.

Dunraven himself came in shortly after, and the doctor went up to him with a curious smile upon his lips.

"There will be a rather patient here for me in a little while, Dunraven," he said, quietly, "unless you induce Miss Valworth to go out into the air for a long drive. She is nervous and unstrung—"

He saw—sharp-eyed man of the world that he was—Dunraven start and glance apprehensively toward the little figure beside the window. Saw the rosy color leap to his face and recede again, leaving him paler than he was before. Then Dunraven walked over to her unsteadily.

"Alesia," he said gently, "did you hear what the doctor says? He thinks she is absolutely necessary that you should go out for a drive. Will you go?"

"No!" she answered, heavily. "I can't. I must remain here."

The doctor had taken the place of Dunraven at her side.

"If you refuse, little one," he said, gently, "you will be ill; and then who will take care of you? I promise that I will remain here in this room until your return, and that nothing shall happen which I do not see. Now, will you go?"

"I will go," she answered, unsteadily, "relying upon that promise."

Dunraven heaved a sigh of relief. "You get into your coat and hat, and the doctor, after one swift look of gratitude into the doctor's eyes; and, going to her own, pinned on her hat and wrapped herself in a great coat, looking at her own reflection in the glass, and she could not help observing how white and wan she had grown. All the pretty color gained during those few days of ecstatic happiness had left her again. Her great dark eyes gleamed from the pale face with peculiar brilliancy. She was conscious that her head ached, and it was with a sense of genuine relief that she descended the stairs and opened the front door.

Dunraven was there to meet her. In spite of the cold, he went bare-headed to the street and placed her in the carriage awaiting her.

"I wish I could go with you, dear," he said, gently. "When you return we must talk this situation over. Something must be done. You are killing yourself, and she fast is all mine. Oh, Alesia, how I regret it all!"

"Don't!" she exclaimed. "When I return, as you said, we will talk it all over; but there is one thing of which you may be certain, Leslie: I shall never desert you as long as you need me, let the cost to me be what it will. I have promised, and I will keep my word."

His expression of gratitude was almost piteous. Perhaps the reason he did not speak was because he could not. He pressed her hand in silence, then closed the carriage door. It started almost at once.

The cold, frosty air did her a world of good. There was color in her cheeks, a new sparkle in her lovely eyes, as the carriage once more stopped before the door, a buoyancy in her step that had not been there when she descended that stoop.

She entered the house with a new lightness of the heart, and a determination that she should conquer every obstacle that came in her path by the force of her will; that if Muriel could compel obedience by will power, so also would she.

She was filled with expectation, with desire for the fight, with life and spirits which she had thought were dead.

She opened the front door with a latch-key which Dunraven had given her, and started up the stairs.

She had come just to the turn of the winding stairs leading to Muriel's room, when suddenly the door opened, softly, noiselessly, with the uncanny soundlessness which characterized everything about her.

Alesia lifted her head.

It was Nathan Simonson who stood before her. Nathan Simonson in the act of leaving Muriel Ogden's room.

The pawnbroker and the daughter of the millionaire.

CHAPTER XIV.

In her surprise at a companionship so strange, Alesia almost forgot the terrible danger that she herself was facing. It was surprise, not terror, that made her turn white and grasp the balustrade to keep herself from falling, but it was ter-

ror and not surprise that made her shrink backward and cinge under the sound of that soft, purring, treacherous voice which she hoped she had heard for the last time.

"Why, pretty one, is it possible that I see you again?" Nathan Simonson asked, his hated Jewish accent making her tremble. "Ah, if you knew how your poor, dear papa and I have grieved over losing you, if you knew how we had searched, you would have been as hard of heart."

Miss Ogden told me of the beautiful addition to this household, but it never once occurred to me that it could be our own Alesia. That is but another evidence of how small the world is. How glad papa will be when I tell him that I have found his treasure!"

Once or twice she opened her mouth to make some plea to him, to entreat him to remain silent regarding her presence there, but then she realized how useless it would all be. She would have passed him but that he blocked her way. He stood there, fully comprehending all her bitter hatred and terror, but it only made the treacherous smile deepen upon his thick, beak-like lips.

"You will go back with me now!" he continued, after a silence which was menacing to her. "You will go back with me and relieve papa of all his frantic suspense and grief. Surely you would not have the heart to refuse after all that I have told you. Come, Alesia!"

He put out his hand and would have placed it upon her arm, but she sprang back upon the landing and out of his reach.

"Never!" she cried, hoarsely, pressing her hands upon her breast in a vain effort to still the wild beating of her heart. "Never! I would die first. You may tell him that! Do you think I would go back to that horrible place of my own will, back to the beatings, the starvation, the awful horror that faced me daily, hourly, where I stood for all those long, cruel years, because I thought it to be my duty, the duty which God had placed upon me, the burden which He had given me to bear, but I know now that He never intended it. There is no law to compel it, and I will not go!"

(To be continued.)

How Fast Do Animals Move?

He is as "slow as an ox," as "fleet as a deer," as "fast as a horse," or as "speedy as a gazelle."

How many times have you heard these expressions, which bring to mind the question, "How fast do animals move?" Few know just how fast or slow they are, but an interesting computation by scientists is designed to throw light on the matter.

A riding horse covers forty inches while walking, while at a jog trot it covers eleven feet in a second. The two-minute horse covers forty-four feet in a second. The leisurely ox moves over only two feet a second when hitched to a wagon and about twenty inches when attached to a plow. The elephant, which can pull more than six horses, moves over about four and one-half feet a second, and running as rapidly as it can is able to travel but eighteen feet a second.

The lion is claimed to run faster than the swiftest running horse, which is from 80 to 100 feet a second according to the country through which it is compelled to travel. Some claim a hare can travel at the rate of sixty feet a second, while others claim it cannot travel more than half that distance. All deer are speedy animals. A roebuck has been known to cover seventy-four feet a second when pursued by dogs.

The giraffe is said to pass over the ground at the rate of about fifty feet a second, while the kangaroo covers ten to fourteen feet a second. A tortoise five inches long makes about a half-inch in a second.

But the records established by the birds never have been equaled by animals.

Wood Alcohol Poison.

How virulent a poison is wood alcohol? Ten drops of this fluid drunk by a susceptible person is enough to cause blindness, according to the Journal of the American Medical Association.

"My wife says that she is going to buy cheaper hats and save money." "Ah, I see; reducing her overhead expenses."

## BENSON'S Corn Starch

In the famous Yellow Package

Don't ask merely for 'cornstarch' or even for 'the best starch', but insist on BENSON'S—the 'Quality Starch' with a reputation gained by half a century's experience.

AT ALL GROCERS

That Lot of Yearlings.

Of all the cattle kind upon the farm, the yearling's lot is usually about the worst. This is too often true when times are good. When prices are high, and when feed is cheap. When this is true, then it is a case of force the feed upon the older animals and get them into marketable condition. Let the yearlings take care of themselves. When the opposite is true, then it is too often a case of making the yearlings stand the worst of it. When milk is high, it is a case of force the cow and starve the yearling.

This is one of the biggest kind of mistakes. All experiment goes to show that gains may be more economically made upon yearlings than with older cattle. It costs less to feed a yearling enough to keep it alive to begin with, and the rest goes to make beef or growth. It doesn't pay to neglect the calf when it is a yearling, ever expecting to make it up again to the calf or to yourself.

Wood Alcohol Poison.

How virulent a poison is wood alcohol? Ten drops of this fluid drunk by a susceptible person is enough to cause blindness, according to the Journal of the American Medical Association.

"My wife says that she is going to buy cheaper hats and save money." "Ah, I see; reducing her overhead expenses."

## STARVATION OR MERCILESS TORTURE

A choice between starvation or merciless torture is the dismal prospect before all victims of indigestion, for although they are in need of food to nourish the body, they are afraid to eat because of the long periods of pain and discomfort that follow even the lightest of meals.

The urgent need of all who suffer from indigestion is to gain strength so that the stomach can extract nourishment from the food taken. Pain after eating is the way the stomach signifies its protest that it is too weak to do nature's work. To take purgatives is only to aggravate the trouble. Dr. Williams' Pink Pills give new strength to weak stomachs because they enrich and purify the blood supply, thus enabling the stomach to digest food naturally. Almost from the first the appetite revives; then food can be taken without pain and the burden of indigestion disappears. The following case proves the truth of these statements. Mr. W. H. Silver, a well-known farmer living in the vicinity of Hemford, N.S., says: "For upwards of seven years I was tortured with indigestion; sometimes I was so bad that I would not taste a bit of hearty food, but would have to content myself with a bit of stale bread. At times I suffered excruciating pains in my stomach, and could hardly sleep at night. I tried various prescriptions, but got no benefit from them and naturally I was in a very reduced state of health. I had come to believe that I was doomed for the balance of my life to this most constant torture, when I read of a case similar to my own cured through the use of Dr. Williams' Pink Pills. This gave me new courage, and I decided to try them. To make a long story short, the use of the Pills for a couple of months completely cured me. This is some two years ago, and I have had no return of the trouble, and am able to eat as hearty a meal as anyone."

You can get Dr. Williams' Pink Pills through your medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

### "Safety First" Candle.

Candles can be easily fitted with attachments to extinguish the light at a set time. To determine the length of time it is necessary to mark a candle of the size used and time how long a certain length of it will burn.

Then it is enough to suspend a small metal dome or cap to which a string is attached directly over the flame and run the opposite end of the string over nails or through screw eyes, so that it can be tied around the candle such a distance from the flame end that the part between the flame and the string will be consumed in the time desired for the light to burn. When this point is reached the string slips off the candle and the cap drops on the flame.

### COLICKY CHILDREN

Colicky children can be promptly cured by Baby's Own Tablets because these Tablets act directly on the stomach and bowels and cleanse them of all impurities. Concerning them Mrs. Jas. C. Slater, Summerville, N.S., writes: "I have used Baby's Own Tablets and am glad to say I have found them an excellent medicine for colic and loss of sleep." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## By the Tomato Route

"Oh, dear, I wish I could go on a mountain trip this summer," sighed Alice as she and her mother sat sewing carpets.

"Why don't you try to earn some money," said her mother. "I've heard of girls raising chickens and doing other things to earn money."

"But, mother," said Alice, "you know I could never earn enough money. Why, it would take almost \$15, and besides, I would want spending money."

"Well, it's up to you, suit yourself about it," said Mrs. Miller as she left the room to get supper.

But her mother's words had made Alice see things in a different light, and the rest of the day she planned ways of earning money. Many plans presented themselves, but all were rejected. Finally she picked up a catalogue that had fallen off the book-stand, and was just going to replace it when her eyes were attracted by the words, "A girl's way of making money." Eagerly she read the item. It was about a poor girl who had raised tomatoes and sold them. From half an acre of land she had cleared \$25 in this way.

Alice's eyes shone with joy when she finished reading the item. "Just what I can do," she exclaimed, "that half acre of worn-out pasture will be just the thing! I'll go and ask father if I can use it."

Mr. Miller immediately gave his consent to his daughter's plan and she went off very happy. The day following, after much planning and thinking, she decided to raise tomatoes. She had heard that they would be in demand about the first of August, and made her plans accordingly. For the next few days one of the hired men was busy manuring and plowing the half acre of pasture under Alice's direction.

"She's got funny ideas about raising tomatoes," he grumbled to Mr. Miller later. "I believe she has been reading that trash the experiment stations are giving out."

A week later Alice proudly surveyed her patch of ground which she had just finished planting with the plants her father had given her. Patiently and faithfully Alice worked through the spring and part of the summer until at last she was rewarded by seeing blossoms here and there on her tomato vines.

By the last of July Alice was ready to begin harvesting her crop. Every afternoon she picked three or four bushels of tomatoes and sold them in the city at fancy prices.

## No More Corns

quick, safe and sure as Putnam's Painless Corn Extractor. Sold everywhere—25c. per bottle.

### Cure Guaranteed

Never known to fail; acts without pain in 24 hours. Is soothing, healing; takes the sting right out. No remedy so quick, safe and sure as Putnam's Painless Corn Extractor. Sold everywhere—25c. per bottle.

### "Breeds" Pearl Buttons.

The United States has gone into the business of "breeding" pearl buttons—at least that is what it amounts to.

A short time ago it was discovered that the mussel beds of the rivers and streams tributary to the Mississippi, from the inhabitants of which we get the shells from which pearl buttons are made, were giving out. The government stepped in and established limitations to the dredging of mussels in certain streams. But this did not help.

A more careful scientific study was made by biological experts employed by the government. It resulted in the discovery of some interesting facts about the life history of the mussel. Among them was that which proved that the diminution in the supply of pearl-button material was not due to the taking out of mussels, but to the destruction of the fish in the waters.

It was learned that in its early stages of development the freshwater mussel is a parasite, its existence depending largely upon its ability to fasten itself to the gills or fins of a fish. Certain kinds of the mussels attach themselves to a particular kind of fish. The "niggerhead" mussel, for instance, one of the most prolific and valuable varieties, is parasite to red herring almost exclusively, and the partial extermination of this fish has had a material effect upon the natural reproduction of mussels.

With this and similar information as a guide the bureau of fisheries has now established a research laboratory a few miles from Muscatine and has gone into the business of mussel farming.

### Very Dear.

Clerk: "I'd like to get a week off, sir, to attend the wedding of a friend."

Employer: "A very dear friend, I should say, to make you want that much time."

Clerk: "Well, sir, after the ceremony she will be my wife."

## Message of Hope

### For All Women

MISS MARY SABOURIN TELLS HOW SHE FOUND HEALTH.

Suffered for Three Years and Could Find No Lasting Relief Till She Used Dodd's Kidney Pills.

Thurso, Que., May 24th (Special). Tired, run-down women can read a message of hope in the statement of Miss Mary Sabourin, an estimable lady living here. In a statement to the public Miss Sabourin says: "I was a sufferer for three years. I was always tired and nervous. My sleep was broken and unrefreshing. I was troubled with headaches and pains in my back. I had heart fluttering to add to my anxiety."

"I was treated by a doctor and a specialist, but nothing seemed to do me any lasting good till I started to use Dodd's Kidney Pills, and I took just three boxes of them."

Nine-tenths of women's troubles come from sick kidneys. Sick kidneys fail in their duty of straining the impurities out of the blood. That means that poison and disease is carried to all parts of the body. The remedy is to cure the kidneys with Dodd's Kidney Pills. If you haven't used them ask your neighbor about them. Nearly every family in Canada is using or has used Dodd's Kidney Pills.

### Salutes and Salutations

During the last few months we have grown so accustomed to seeing the military salute given and returned as scarcely to notice it. If we have a thought about the matter it is probably to the effect that a walk through the streets must be rather fatiguing to those in uniforms. Yet the soldier's salute has many advantages over the less graceful and definite forms of greeting in use among civilians. The soldier has or ought to have, no qualms on the subject; not only does he know whom to salute, but he is also taught exactly how to do it. At a stated time he is to raise the right hand with a circular movement to a stated spot, and after a stated interval he is to cut the hand smartly away.

The civilian has no such straight and simple path marked out for him, but must learn to greet his fellows as best he can. Some people never achieve anything but a frozen glare of recognition; others compel themselves to "grin horribly" a ghastly smile, but it is so mechanical a contortion as to defeat its comparatively genial purpose. Others again begin smiling at such long range that when they come to close quarters their nod has prematurely spent its force.

A really good nod is one of the richest gifts of Nature. It diffuses so jolly and comfortable a glow that, if we spy the happy possessor in the distance, we cross the road just for the pleasure of meeting him. But this is a rare case, and we are more likely to plunge recklessly into a cab in order to avoid an acquaintance. There are embarrassments enough in the matter of nodding without mentioning our horrid doubts as to whether or not we shall be recognized. Yet those doubts will cause men to pass each other with averted eyes, or with a founty unconsciousness that never deceived anybody from the beginning of time.

### WHEN DINNER COMES

One Ought to Have a Good Appetite.

A good appetite is the best sauce. It goes a long way toward helping in the digestive process, and that is absolutely essential to health and strength.

Many persons have found that Grape-Nuts food is not only nourishing but is a great appetizer, and children like the taste of it and grow strong and rosy from its use. It is especially the food to make a weak stomach strong and create an appetite for dinner.

"I am 57 years old," writes a grandmother, "and have had a weak stomach from childhood. By great care as to my diet I enjoyed a reasonable degree of health, but never found anything to equal Grape-Nuts as a standby."

"When I have no appetite for breakfast and just eat to keep up my strength, I take 4 teaspoonfuls of Grape-Nuts with good rich milk, and when dinner comes I am hungry. While if I go without any breakfast I never feel like eating dinner. Grape-Nuts for breakfast seems to make a healthy appetite for dinner."

"My little grandson was sick with stomach trouble during the past summer, and finally we put him on Grape-Nuts. Now he is growing plump and well. When asked if he wants his nurse or Grape-Nuts, he brightens up and points to the cupboard. He was no trouble to wean at all—thanks to Grape-Nuts."

Name given by Canadian Postum Co., Windsor, Ont. Read, "The Road to Wellville," in pgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

### A Brutal German Joke.

French Officer (to released French prisoner-of-war): "Well, how did you get on in Germany?" Soldier: "Splendid!" Officer: "Then you'll be confined to barracks until you can invent a story of ill-treatment."

### COOK WELL AND SAVE.

Too many cooks add to the high cost of living by not knowing that the way meats are cooked may add much to their cost.

Nearly every cook knows that meats shrink in cooking, but not all of them are aware that boiled beef or broiled steak has more weight than a roast. An investigation has shown that 15 per cent. of the weight of the meat is lost when it is fried or steamed; in boiling, 20 per cent; in baking, 25 per cent; and in roasting 30 per cent. of the weight is lost.

When you roast, broil or bake you may obtain the best results by having the intense heat combined with free action of the hot air which approaches the nearest to roasting before an open fire, which is what the makers of modern stoves aim for.

When the meat has been in a hot oven for fifteen minutes allow another fifteen minutes for each pound of meat while it is cooking. If the meat is boiled, a longer time is necessary, and pork requires ample time.

## A Nova Scotia Case Of Interest to All Women

Halifax Sends Out a Message of Help to Many People.

Halifax, N.S., Dec. 15.—When interviewed at her home at 194 Argyle St., Mrs. Haverstock was quite willing to talk of her peculiarly unfortunate case. "I was always 'blue' and depressed, felt weak, languid and utterly unfit for any work. My stomach was so disordered that I had no appetite. What I did eat disagreed. I suffered greatly from dizziness and sick headache and feared a nervous breakdown. Upon my druggist's recommendation I used Dr. Hamilton's Pills."

"I felt better at once. Every day I improved. In six weeks I was a well woman, cured completely after different physicians had failed to help me. It is for this reason that I strongly urge sufferers with stomach or digestive troubles to use Dr. Hamilton's Pills."

Dr. Hamilton's Pills strengthen the stomach, improve digestion, strengthen the nerves and restore debilitated systems to health. By cleansing the blood of long-standing impurities, by bringing the system to a high point of vigor, they effectually chase away weariness, depression and disease. Good for young or old, for men, for women, for children. All dealers sell Dr. Hamilton's Pills of Mandrake and Butternut.

### His Reason.

"What makes him act so queerly?"

"He wants people to understand that he is the first person singular!"

Ask for Minard's and take no other.

### Mother Wit.

Mother (to son who has overslept): "You need a self-starter to get you up in the morning."

Son (sotto voce): "Not when I have a crank like you to get me going."

Had ship's anchor fall on my knee and leg, and ankle swelled up and for six days I could not move it or get help. I then started to use MINARD'S LINIMENT and two bottles cured me. PROSPER FERGUSON.

"Well, we have exhausted reason, logic, common sense, and justice. What more can we do?" "I guess we'll simply have to go to law."

Keep Minard's Liniment in the house.

A large white marble in a saucepan will, as it rolls about with the boiling, keep the liquid constantly stirred.

Branding for crimes is still performed in some countries, and was not abolished in Great Britain until 1822.

Minard's Liniment used by Physicians.

ED. 7. ISSUE 22-15.

### Russia Makes Biggest Bell.

Russia is in the lead in the line of bells, some of her manufacture being the most famous in the world. It is said that in Moscow alone, before the great fire, there were no fewer than 1,706 large bells. One called the Giant, which was cast in the sixteenth century and broken by falling from its support and recast in 1654, was so large that it required twenty-four men to ring it. Its weight was estimated at 288,000 pounds.

The Giant was suspended from an immense beam at the foot of a bell tower, but it again fell during the fire of June 19, 1706, and was a second time broken to fragments, which were used with additional material in 1732 in casting the King of Bells, also a product of Moscow. The value of metal put into it was \$300,000.

## Sore Eyes

Granulated Eyelids. Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye Freckle Druggists or Murine Eye Remedy Co., Chicago.

### He Hadn't Heard.

Teacher: "Where is the Dead Sea?"

Tommie: "Don't know, ma'am."

"Don't know where the Dead Sea is?"

"No, ma'am. I didn't even know any of the seas were sick, ma'am."

## PILES.

You will find relief in Zam-Buk!  
It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores—50c box.

## The Shawville Boot and Shoe Store

-- And for that Wedding, Sir --

You will surely want to be correctly attired —not only "in style," but perhaps a step in advance. Then let us recommend

**INVICTUS**

"THE BEST GOOD SHOE"

We have a complete assortment of the new styles, and our range is sufficiently large to fill the most exacting requirements.

**P. E. SMILEY.**

### LOCAL NEWS

Mr. A. M. Creig, of Almonte, has been appointed junior judge of the County of Bruce. When he enters upon his new duties he will make his home at Walkerton.

Amateurs — Having received the agency for the Eastman Kodaks, Films, Velox papers, etc., an ample supply of these goods being placed in stock as indicated by our show window, I am in a better position than ever to fill your orders without delay. H. IMISON, Artist.

Major Gordon B. Wright of Third Field Co. Canadian Engineers, of Ottawa, was one of those killed in action in a recent engagement near Ypres. As reports come in from day to day, the number of Canadian homes that are saddened by the loss of loved ones grows apace!

### Oh! It's Easy!

If any of our readers think it is an easy job to get up a newspaper every week they should try it. Just for a sample of what it is like, sit down some leisure moments and write a few items describing such local events as you can call to mind. Then reflect that a sheet of note paper will contain enough matter for about two inches, or one-tenth of a column. Now fill from 20 to 30 cols. every week, hustle for subscribers, look after the funds, see to the advertising, make up the forms, run the press, take a turn at type setting, kick the job press a few thousand times, and you have an idea what a country printer does for a pastime.

### What Fits Men for Heaven

It isn't the amount of religion a man has that makes him good and fits him for heaven; it is the amount he uses. Long prayers and loud professions do not count; but the man who loves his fellow-men and fellowwomen, who ministers to the afflicted and wears a smile for all, including his wife and children, who never kicks the dog when he ought to kick himself, who speaks well of people when their backs are turned, and under all circumstances keeps an even mind—that man hasn't got to die to go to heaven. He gets to feeling happy all the time as a matter of habit, and he takes all the dispensation of life with philosophical satisfaction.—Tweed Advocate.

**GEO. W. PINGLE**  
.. Piano Tuner and ..  
Player Piano Expert  
OF OTTAWA.

will make his annual trip to Shawville, 1st week of June. All orders left at THE EQUITY Office will receive careful attention. Sixteen years' experience. Six years in the largest factory in Canada. Satisfaction guaranteed.

I remain very truly,

**GEO. W. PINGLE.**

To commemorate the opening of our new studio, I will give 14 photos for the dozen from now until June 3rd. Studio ground floor, King St. H. IMISON, Artist.

Former Police Lieutenant Becker, who has twice been found guilty and sentenced to die for the murder of Herman Rosenthal, has had his latter appeal denied and the date of his execution has been fixed for July 12. Becker has influential friends and money is forthcoming to help him in the courts, but the best that can be done apparently is to delay the final punishment.

### GREERMOUNT

Most of the farmers in this section have already finished their crops. Miss Eva Roy, of Ladysmith, spent the week end the guest of her friend, Miss F. Erwin, of this place.

A crowd of young people of this section drove on Friday evening to the home of Mr. and Mrs. Robert Rooney, Rooney P. O., where they spent a most enjoyable evening.

Miss Marie Smith, of the Shawville academy, spent the week end with her parents, Mr. and Mrs. George Smith.

Miss M. J. Dale, of Schwartz, spent a few days the guest of her parents at this place.

Mr. Robert Havelin has re-opened the blacksmith-shop at Cole's Creek, formerly owned by Mr. F. Dale.

Wonder who is the gent who drives the old bay nag from the Bay?

Could it be possible that young man has taken the wink? "He did come down." We think we hear in the distance the chime of wedding bells!

Hope they don't forget to ask

MUTT AND JEFF.

### ELMSIDE

May 29.—Mr. Higgins spent the week end with his parents.

Miss Mabel Stewart, trained nurse, is holidaying here at present.

Several families are occupying their cottages at Norway Bay, and a good many new cottages are being built.

Mr. James M. McCredie of Mohr Island, spent the week end with his mother.

Mr. and Mrs. Lloyd Wilson are visiting at Mr. W. C. Young's.

Mr. and Mrs. "Billy" Young have removed to Renfrew.

Mr. Ed. Grant and Miss Verna McCredie spent Victoria Day at Smiths Falls, the guests of Mr. and Mrs. Levi Young.

Mr. John A. McCredie of the E. B. Eddy staff, spent the week end with relatives here.

We are glad Nurse Lucy Graham, who has been on the sick list for some time, is recovering.

Mrs. (Rev.) MacLean is also able to be about again.

Mrs. Sam Woods, who had an attack of pneumonia some time ago, is not recovering as quickly as we would like.

Quite a number of men are at work grading the C. N. R., and several trains pass each day.

Messrs. Sam Cuthbertson and Lionel Scoble are busy with their clipping machine shearing sheep, and no doubt think they could give a few lessons to some of the Macdonald College boys.

Mr. Allen McGillis had a stroke of paralysis last week and his condition is serious.

Mrs. Fred Tarrant and baby, also Miss Jean Morrison, of Foxwarren, are visiting relatives here.—Com.
